This country snapshot provides an overview of national data relating to sexual and reproductive health and rights (SRHR) throughout the life course. Realization of SRHR requires provision of comprehensive, people-centred services, that address the different elements of SRHR, and which are supported by an enabling environment, quality health systems, and meaningful community engagement. Multiple, synergistic cross-linkages exist within and between the different SRHR elements, leading to sequential outcome benefits throughout the life course.

By highlighting the national SRHR situation – including successes, areas for improvement, and data gaps – this snapshot can be used for determining priorities, planning of programmes, resource mobilization, and strengthening of health systems, service delivery and community engagement.

This snapshot uses the latest data publically available at the publication date, from reputable international sources (see endnotes for the year and source of each data point). It is acknowledged that intersectionality and people-centredness are not well reflected in available data, and that many categories of information currently collected are gender-binary.
The Sustainable Development Goals (SDGs) and Universal Health Coverage (UHC) agendas provide important opportunities to realise sexual and reproductive health and rights for all, including key and vulnerable populations, and to reimagine and enhance equitable access and quality coverage of SRH services. Delivery of comprehensive SRHR interventions throughout the life course is an essential component of UHC.

Demographic data

- **Population size**: 33.0m
  - Female: 16.6m
  - Male: 16.4m

Life expectancy at birth

- Female: 81.3 years
- Male: 78.5 years

**HIV incidence per 1,000 population (15+)**: 0.14

**HIV prevalence among adults (15-49)**: 0.3%
ENABLING ENVIRONMENT

Supportive laws and policies, and access to justice are essential to eliminate stigma, discrimination, violence, coercion and exclusion in health care. Such laws and policies create a safe and supportive enabling environment that meets the SRHR needs of all people, especially key and vulnerable populations. Harmful laws need to be amended, and damaging practices need to be countered at all levels.

ND = No Data

Global Targets: Achieved  Challenges remain  Major challenges remain

ENABLING ENVIRONMENT

Impact on integrated SRHR: Supportive  Partial  Punitive

Laws and policies

People living with HIV
Are there laws or policies that:
- Criminalize transmission, exposure or non-disclosure of HIV19  Partial
- Restrict entry, stay and residence of people living with HIV20  ND
- Protect against discrimination on basis of HIV status21  ND
- Allow HIV self-testing22  No
- Make oral pre-exposure prophylaxis for HIV (PrEP) available23  ND

Key populations
Are there laws or policies that:
- Criminalize same-sex sexual behaviour24  No
- Criminalize sex work25  Yes
- Allow the death penalty for people convicted of drug-related offences26  ND
- Support a harm reduction approach for people who use drugs27  ND
- Legally recognize a third gender28  ND

SRHR and gender-based violence
Are there laws or policies that:
- Allow safe abortion29  Yes
  - To save a woman's life
  - To preserve a woman's physical health
  - To preserve a woman's mental health
  - In case of rape
  - In case of incest
  - Owing to foetal impairment
  - For economic or social reasons
  - On request
- Require spousal consent for married women to access SRH services30  No
- Explicitly criminalize marital rape31  Yes
- Criminalize domestic violence32  Yes
- Criminalize sexual harassment33  Yes
- Require provision of CSE in primary school34  Yes
- National strategy or policy on self-care interventions35  ND

Extent to which laws and regulations guarantee access to SRH care and education (SDG 5.6.2)36

**Universal Health Coverage**

Coverage of essential health services (SDG 3.8.1)

- [44] 77%

Catastrophic health spending (SDG 3.8.2)

- Households where expenditure on health is greater than:
  - 10% of income: 9.2%
  - 25% of income: 1.3%

**Governance**

Legislation on universal health coverage

- [47] No

**Health workforce**

Skilled health professionals (per 10,000 population)

- Doctors: 8.2
- Nurses and Midwives: 29.8
- Pharmacists: 0.52

**Supply Chain**

Availability of essential medicines and commodities in Public Health facilities

- ND

Male condom stock-out in the past 12 months

- No

**Health information**

Paper-based or electronic health information system

- Both

Antenatal care data captured in health information system

- Yes

**Health financing**

Total health expenditure as a percentage of GDP

- 5.2%

Government health expenditure as percentage of GDP

- 3.3%

Total health expenditure per capita (USD)

- $369.1

Government expenditure on reproductive health per capita (USD)

- ND

**Integrated service delivery**

Health facilities delivering HIV counselling and testing with SRH services

- All

Health facilities delivering HIV treatment and care with SRH services

- None
Women have the right to decide whether, when and how many children they want to have, and to do so safely, without fear of acquiring STIs including HIV, or of maternal morbidity and mortality. Women require access to a choice of modern contraceptive methods and quality antenatal, childbirth and postnatal care, safe abortion care (to the full extent of the law), post abortion care and infertility services.

**Contraception / Family Planning**

- **Demand for family planning**
  - Satisfied with a modern method: 66.6%
- **Knowledge of modern contraceptive methods**
  - Self injectable: 70.5%
- **Modern contraceptive method (women 15-49)**
  - Injection: 33.5%
  - Self injectable: ND
  - Pill: 13.5%
  - Male condom: 25.3%
  - IUD: 4.0%
  - Implant: 5.3%
  - Female sterilization: 17.5%
  - Other modern methods: 1.1%
- **Unmet need for family planning**: 6.3%
- **Use of modern contraceptive methods**
  - Pill: 55.0%

**Antenatal, delivery and postnatal care**

- **Attending antenatal clinic**
  - At least once: 97.0%
  - At least 4 times: 95.6%
- **Proportion of births attended by skilled health personnel**: 94.4%
- **Births by caesarean section**: 31.6%
- **Postnatal checkup in first two days after birth**: 95.7%

**Vertical transmission of HIV**

- **Pregnant women tested for HIV**: 79.9%
- **Early infant diagnosis (HIV-testing of infants at risk)**: 84.4%
- **Vertical transmission (at 12 months)**: 9.9%
- **Primary infertility among women**: ND

**Vertical transmission of syphilis**

- **Tested for syphilis at 1st antenatal care visit**: 93.7%
- **Percentage testing positive for syphilis who are treated**: 96.0%
- **Congenital syphilis rate (per 100,000 live births)**: 33.9

**Abortion**

- **Abortions per 1,000 women (15-49)**: ND
**HIV prevention**

Condom use at last high risk sex (15-49)

Coverage of national screening programme

|                | 10-50% |

**SERVICE DELIVERY: SEXUAL HEALTH**

Sexual health is a state of physical, emotional, mental and social well-being in relation to sexuality. It requires a positive and respectful approach to sexuality and sexual relationships, as well as the possibility of having pleasurable and safe sexual experiences, free of coercion, stigma, discrimination and violence.

ND = No Data

Global Targets:

- Achieved
- Challenges remain
- Major challenges remain

**ND** = No Data
SERVICE DELIVERY: SEXUAL AND REPRODUCTIVE HEALTH FOR ALL

Everyone has the right to access sexual and reproductive health services and information, free of force or coercion, and irrespective of age, sex, sexual orientation, gender identity, ability, socio-economic or occupational status.

ND = No Data

Global Targets: Achieved  Challenges remain  Major challenges remain

Harmful practices
- Girls married before 18: 17.4%
- Female genital mutilation / cutting: ND

Comprehensive Sexuality Education
- Primary schools fully implementing national CSE policy: ND
- Secondary schools fully implementing national CSE policy: ND

Adolescent sexual health
- Had multiple partners and used a condom at last sex (15-19): 33.9% (Female), ND (Male)
- Correct knowledge of HIV prevention (15-24): 75.3% (Female), 0% (Male)

1. The cutoff for data included in this Infographic Snapshot is 15/04/2021. The year provided for each endnote is the date of the latest validated data with an earliest date of 2011. Where data is not available in an international source ‘No data’ is stated. This does not mean that no data exists for this indicator but that no data was found in internationally validated data sources.

10. 2017. Indicator: SDG3.1.1. The estimated number of women, between the age of 15-49, who die from pregnancy-related causes while pregnant or within 42 days of termination of pregnancy, per 100,000 live births. Source: SDG database - http://unstats.un.org/sdgs/indicators/database

34. 2019. Indicator: SDG 5.6.2. Extent to which countries have laws and regulations that guarantee full and equal access to women and men aged 15 years and older to SRH care, information and education. Source: SDG database - https://unstats.un.org/sdgs/indicators/database

36. No Data. Indicator: Legal minimum age for marriage without parental consent (where an age range given, the lowest figure was used). Source: United Nations Statistics Division - https://unstats.un.org/unsd/gender/Data/Qualitative%20Indicators.html

38. 2012. Indicator: Percentage of married women who say that they have the final say in own health care. Source: DHS - http://statcompiler.com

43. No Data. Indicator: Percentage of women and men 15–49 years old who report discriminatory attitudes towards people living with HIV. Source: UNAIDS - https://aidsinfo.unaids.org
64. 2015. Indicator: Percentage of women aged 15 to 49 with a live birth in a given time period that received antenatal care provided by skilled health personnel (doctor, nurse or midwife) at least once during pregnancy Source: UNICEF antenatal care coverage database - http://data.unicef.org/maternal-health/antenatal-care.html
65. 2015. Indicator: Percentage of women aged 15 to 49 with a live birth in a given time period that received antenatal care four or more times Source: UNICEF. Antenatal care coverage database - http://data.unicef.org/maternal-health/antenatal-care.html
73. 2019. Indicator: Percentage of women accessing antenatal care services who were tested for syphilis at first antenatal care visit. Source: WHO Global Health Observatory data repository - http://apps.who.int/gho/data/view.main.Z810
75. 2016. Indicator: Congenital syphilis rate per 100,000 live births. Source: WHO Global Health Observatory data repository - http://apps.who.int/gho/data/view.main.CONGENITALSYPST
87. 2012. Indicator: Percentage of women aged 15-49 who believe a husband/partner is justified in hitting or beating his wife/partner for any of the following five reasons: argues with him; refuses to have sex; burns the food; goes out without telling him; or when she neglects the children. Source: Demographic and Health Surveys (DHS) and Multiple Indicator Cluster Surveys (MICS) - http://data.worldbank.org/indicator/SG.VAM.REAS.ZS
88. 2019. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: first-line support (psychological first aid) - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/
98. No Data. Indicator: Percentage of primary schools that have fully implemented education policies on life skills-based HIV and sexuality education. Source: UNAIDS Laws and Policies Analytics - https://aidsinfo.unaids.org
100. 2012. Indicator: Percentage of adolescents (aged 15–19) who reported having sexual intercourse with more than one partner in the last 12 months and who reported the use of a condom during their last sexual intercourse. Source: Demographic and Health Survey 2012. Compiled by UNICEF - https://data.unicef.org/topic/hiv-aids/adolescents-young-people/
102. It is recognised that there are also a number of vulnerable populations at greater risk of poor HIV or SRH outcomes such as migrants/refugees, indigenous populations, people with disabilities, people experiencing homelessness etc. These are not included in this snapshot due to a lack of data.
105. No Data. Indicator: Percentage of men who have sex with men who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org
106. No Data. Indicator: Percentage of men reporting the use of a condom the last time they had anal sex with a male partner. Source: UNAIDS estimates - https://aidsinfo.unaids.org
112. No Data. Indicator: Percentage of people who inject drugs who are living with HIV. Source: UNAIDS estimates - https://aidsinfo.unaids.org
113. No Data. Indicator: Percentage of people who inject drugs who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org
114. No Data. Indicator: Percentage of people who inject drugs reporting the use of a condom the last time they had sexual intercourse. Source: UNAIDS estimates - https://aidsinfo.unaids.org
117. No Data. Indicator: Percentage of transgender people who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org
118. No Data. Indicator: Percentage of transgender people reporting the use of a condom the last time they had sexual intercourse. Source: UNAIDS estimates - https://aidsinfo.unaids.org
120. 2018. Indicator: Percentage of prisoners who are living with HIV. Source: UNAIDS estimates - https://aidsinfo.unaids.org
121. No Data. Indicator: Percentage of prisoners who received an HIV test in the past 12 months and know their results. Source: No known source
122. No Data. Indicator: Percentage of prisoners reporting the use of a condom the last time they had sexual intercourse. Source: No known source
