This country snapshot provides an overview of national data relating to sexual and reproductive health and rights (SRHR) throughout the life course. Realization of SRHR requires provision of comprehensive, people-centred services, that address the different elements of SRHR, and which are supported by an enabling environment, quality health systems, and meaningful community engagement. Multiple, synergistic cross-linkages exist within and between the different SRHR elements, leading to sequential outcome benefits throughout the life course.

By highlighting the national SRHR situation - including successes, areas for improvement, and data gaps - this snapshot can be used for determining priorities, planning of programmes, resource mobilization, and strengthening of health systems, service delivery and community engagement.

This snapshot uses the latest data publically available at the publication date, from reputable international sources (see endnotes for the year and source of each data point). It is acknowledged that intersectionality and people-centredness are not well reflected in available data, and that many categories of information currently collected are gender-binary.
**Demographic data**

<table>
<thead>
<tr>
<th>Population size(^6)</th>
<th>Female ND</th>
<th>Male ND</th>
</tr>
</thead>
</table>

| Life expectancy at birth\(^5\) |
|-------------------------------|-----------|---------|
| Female ND | Male ND |

| Population age distribution\(^6\) |
|-----------------------------------|-----------|---------|
| 0-14 ND | 15-24 ND | 25-49 ND | 50+ ND |

**Sexual and Reproductive Health**

| Total fertility rate\(^7\) |
|---------------------------|-----------|
| births per woman ND |

| Adolescent birth rate\(^8\) |
|----------------------------|-----------|
| per 1,000 women aged 15-19 ND |

| Median age at first sex among young people (20-24)\(^9\) |
|---------------------------------|-----------|
| Male ND | Female ND |

| Young women (20-24) married before age 18\(^{10}\) |
|---------------------------------|-----------|
| ND |

| Maternal mortality ratio\(^{11}\) |
|---------------------------------|-----------|
| per 100,000 live births ND |

| Maternal mortality due to HIV\(^{12}\) |
|---------------------------------|-----------|
| ND |

| Neonatal mortality rate\(^{13}\) |
|---------------------------------|-----------|
| 10.3 per 1000 live births |

**HIV**

| Number of new HIV infections\(^{14}\) |
|-------------------------------------|-----------|
| Child (0-14) ND |

| Number of people living with HIV\(^{15}\) |
|------------------------------------------|-----------|
| Female (15-24) ND |

| Number of AIDS related deaths\(^{16}\) |
|--------------------------------------|-----------|
| Male (15-24) ND |

| HIV incidence per 1,000 population (15+)\(^{17}\) |
|---------------------------------|-----------|
| ND |

| HIV prevalence among adults (15-49)\(^{18}\) |
|---------------------------------|-----------|
| ND |
**ENABLING ENVIRONMENT**

Supportive laws and policies, and access to justice are essential to eliminate stigma, discrimination, violence, coercion and exclusion in health care. Such laws and policies create a safe and supportive enabling environment that meets the SRHR needs of all people, especially key and vulnerable populations. Harmful laws need to be amended, and damaging practices need to be countered at all levels.

ND = No Data

### Global Targets:
- **Achieved**
- **Challenges remain**
- **Major challenges remain**

### Laws and policies

#### People living with HIV

Are there laws or policies that:
- Criminalize transmission, exposure or non-disclosure of HIV
  - ND
- Restrict entry, stay and residence of people living with HIV
  - ND
- Protect against discrimination on basis of HIV status
  - ND
- Allow HIV self-testing
  - No
- Make oral pre-exposure prophylaxis for HIV (PrEP) available
  - ND

#### Key populations

Are there laws or policies that:
- Criminalize same-sex sexual behaviour
  - Yes
- Criminalize sex work
  - ND
- Allow the death penalty for people convicted of drug-related offences
  - ND
- Support a harm reduction approach for people who use drugs
  - ND
- Legally recognize a third gender
  - ND

### SRHR and gender-based violence

Are there laws or policies that:
- Allow safe abortion
  - ND
  - To save a woman’s life
  - ND
  - To preserve a woman’s physical health
  - ND
  - To preserve a woman’s mental health
  - ND
  - In case of rape
  - ND
  - In case of incest
  - ND
  - Owing to foetal impairment
  - ND
  - For economic or social reasons
  - ND
  - On request
  - ND
- Require spousal consent for married women to access SRH services
  - No
- Explicitly criminalize marital rape
  - No
- Criminalize domestic violence
  - Yes
- Criminalize sexual harassment
  - No
- Require provision of CSE in primary school
  - ND
- National strategy or policy on self-care interventions
  - ND

### Extent to which laws and regulations guarantee access to SRH care and education (SDG 5.6.2)

<table>
<thead>
<tr>
<th>Service</th>
<th>Maternity care</th>
<th>Family planning</th>
<th>CSE</th>
<th>Sexual health</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>ND</td>
<td>ND</td>
<td>ND</td>
<td>ND</td>
<td>ND</td>
</tr>
</tbody>
</table>

### Age of Consent

**Legal age for consent to sexual intercourse**
- Female
  - ND
- Male
  - ND

**Legal age for marriage without parental consent**
- Female
  - 16 yrs
- Male
  - 16 yrs

<table>
<thead>
<tr>
<th>Legal age requiring parental consent for adolescents to access SRH services</th>
</tr>
</thead>
<tbody>
<tr>
<td>Female</td>
</tr>
<tr>
<td>Male</td>
</tr>
</tbody>
</table>

Laws requiring parental consent for adolescents to access SRH services
- Yes
- <16 yrs

### Women’s empowerment

Percentage of women that believe they should have final say in decisions regarding their own healthcare
- ND

Percentage of women (15-49) making SRHR decisions
- ND

Global Gender Gap Index
- Ranking (out of ND countries)
  - Score (1.0 = parity)
  - ND

Stigma

Percentage of general population reporting discriminatory attitudes towards people living with HIV
- ND

### Gender-based violence

Legal age for marriage without parental consent
Universal Health Coverage

Coverage of essential health services (SDG 3.8.1)\(^a\)

ND

Catastrophic health spending (SDG 3.8.2)

Households where expenditure on health is greater than:

- 10% of income\(^{e5}\)
- 25% of income\(^{e6}\)

Governance

Legislation on universal health coverage\(^{e7}\)

No

Health workforce

Skilled health professionals (per 10,000 population)

- Doctors\(^{e8a}\)
- Nurses and Midwives\(^{e8b}\)
- Pharmacists\(^{e8c}\)

Supply Chain

Availability of essential medicines and commodities in Public Health facilities\(^e9\)

ND

Health information

- Male condom stock-out in the past 12 months\(^{e0}\)
- Paper-based or electronic health information system\(^{e1}\)
- Antenatal care data captured in health information system\(^{e2}\)

Health financing

Total health expenditure as a percentage of GDP\(^{e3}\)

5.3%

Government health expenditure as percentage of GDP\(^{e4}\)

2.5%

Total health expenditure per capita (USD)\(^{e5}\)

$992.6

Government expenditure on reproductive health per capita (USD)\(^{e6}\)

ND

Integrated service delivery

Health facilities delivering HIV counselling and testing with SRH services\(^{e7}\)

Data Not Available

Health facilities delivering HIV treatment and care with SRH services\(^{e8}\)

Data Not Available
Women have the right to decide whether, when and how many children they want to have, and to do so safely, without fear of acquiring STIs including HIV, or of maternal morbidity and mortality. Women require access to a choice of modern contraceptive methods and quality antenatal, childbirth and postnatal care, safe abortion care (to the full extent of the law), post abortion care and infertility services.

ND = No Data

Global Targets: Achieved Challenges remain Major challenges remain

### Contraception / Family Planning

- **Demand for family planning satisfied with a modern method of contraception (15-49)**
  - ND

- **Knowledge of modern contraceptive methods**
  - ND

- **Modern contraceptive method (women 15-49)**
  - Injection: ND
  - Self injectable: ND
  - Pill: ND
  - Male condom: ND
  - IUD: ND
  - Implant: ND
  - Female sterilization: ND
  - Other modern methods: ND

- **Unmet need for family planning (15-49)**
  - ND

- **Use of modern contraceptive methods (women 15-49)**
  - ND

### Antenatal, delivery and postnatal care

- **Attending antenatal clinic**
  - At least once
    - ND
  - At least 4 times
    - ND

- **Proportion of births attended by skilled health personnel**
  - 100.0%

- **Births by caesarean section**
  - ND

- **Postnatal checkup in first two days after birth**
  - ND

### Vertical transmission of HIV

- **Pregnant women tested for HIV**
  - ND

- **Early infant diagnosis (HIV-testing of infants at risk)**
  - ND

- **Vertical transmission (at 12 months)**
  - ND

- **Primary infertility among women**
  - ND

### Vertical transmission of syphilis

- **Tested for syphilis at 1st antenatal care visit**
  - 100.0%

- **Percentage testing positive for syphilis who are treated**
  - 100.0%

- **Congenital syphilis rate (per 100,000 live births)**
  - 0.0

### Abortion

- **Abortions per 1,000 women (15-49)**
  - ND
**HIV prevention**

<table>
<thead>
<tr>
<th>Condom use at last high risk sex (15-49)</th>
<th>ND</th>
</tr>
</thead>
<tbody>
<tr>
<td>Male circumcision</td>
<td>ND</td>
</tr>
</tbody>
</table>

**95-95-95 testing and treatment cascade**

<table>
<thead>
<tr>
<th>People living with HIV who know their status (15+)&lt;sup&gt;79&lt;/sup&gt;</th>
<th>ND</th>
</tr>
</thead>
<tbody>
<tr>
<td>People who are on ART who achieve viral load suppression (15+)&lt;sup&gt;81&lt;/sup&gt;</td>
<td>ND</td>
</tr>
</tbody>
</table>

**PrEP and HIV self-testing**

<table>
<thead>
<tr>
<th>Current oral pre-exposure prophylaxis for HIV (PrEP) users&lt;sup&gt;83&lt;/sup&gt;</th>
<th>ND</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIV self tests conducted&lt;sup&gt;83&lt;/sup&gt;</td>
<td>ND</td>
</tr>
</tbody>
</table>

**Syphilis**

| Active syphilis among men who have sex with men<sup>84</sup> | ND |
| Active syphilis among sex workers<sup>85</sup> | ND |

**Gender based violence**

| Women experiencing physical or sexual violence in past 12 months (15-49)<sup>86</sup> | ND |
| Wife agrees husband justified beating her - at least one reason specified<sup>87</sup> | ND |

**Care/support provided by service delivery points in cases of rape or incest**

| First-line support (psychological first aid)<sup>88</sup> | ND |
| Emergency contraception for women (within 5 days)<sup>85</sup> | ND |
| Safe abortion (in accordance with national laws)<sup>80</sup> | ND |
| Post-exposure prophylaxis for STIs and HIV (within 72 hours)<sup>85</sup> | ND |

**Cervical cancer**

| Existence of national HPV vaccination programme<sup>82</sup> | No |
| Existence of national cervical cancer screening programme<sup>83</sup> | No |
| Type of programme<sup>84</sup> | None |
| Coverage of national screening programme<sup>85</sup> | 0% |
Harmful practices

- Girls married before 18
- Female genital mutilation / cutting

Comprehensive Sexuality Education

- Primary schools fully implementing national CSE policy
- Secondary schools fully implementing national CSE policy

Adolescent sexual health

- Had multiple partners and used a condom at last sex (15-19)
- Correct knowledge of HIV prevention (15-24)

Key populations

<table>
<thead>
<tr>
<th>Population size estimate</th>
<th>HIV prevalence</th>

The cutoff for data included in this Infographic Snapshot is 15/04/2021. The year provided for each endnote is the date of the latest available data with an earliest date of 2011. Where data is not available in an international data source ‘No data’ is stated. This does not mean that no data exists for this indicator but that no data was found in internationally validated data sources.

11. No Data. Indicator: SDG3.1.1. The estimated number of women, between the age of 15-49, who die from pregnancy-related causes while pregnant or within 42 days of termination of pregnancy, per 100,000 live births. Source: SDG database - https://unstats.un.org/sdgs/indicators/database

36. No Data. Indicator: SDG 5.6.2. Extent to which countries have laws and regulations that guarantee full and equal access to women and men aged 15 years and older to SRH care, information and education. Source: SDG database - https://unstats.un.org/sdgs/indicators/database

41. No Data. Indicator: Percentage of married women who say that they have the final say in own health care. Source: DHS - http://www.statcompiler.com/

59. No Data. Indicator: SDG 3.7.1. Percentage of total demand for family planning among married or in-union women aged 15 to 49 that is satisfied with modern methods (modern contraceptive prevalence divided by total demand for family planning). Source: SDG database - https://unstats.un.org/sdg/indicators/database
64. No Data. Indicator: Percentage of women aged 15 to 49 with a live birth in a given time period that received antenatal care provided by skilled health personnel (doctor, nurse or midwife) at least once during pregnancy. Source: UNICEF antenatal care coverage database - http://data.unicef.org/maternal-health/antenatal-care.html
65. No Data. Indicator: Percentage of women aged 15 to 49 with a live birth in a given time period that received antenatal care four or more times. Source: UNICEF. Antenatal care coverage database - http://data.unicef.org/maternal-health/antenatal-care.html
70. No Data. Indicator: Percentage of infants born to women living with HIV receiving a virological test for HIV within two months of birth. Source: UNAIDS estimates - https://aidsinfo.unaids.org
73. 2019. Indicator: Percentage of women accessing antenatal care services who were tested for syphilis at first antenatal care visit. Source: WHO Global Health Observatory data repository - http://apps.who.int/gho/data/view.main.13620
75. 2016. Indicator: Congenital syphilis rate per 100,000 live births. Source: WHO Global Health Observatory data repository - http://apps.who.int/gho/data/view.main.CONGENITALSYPFSTI
82. No Data. Indicator: Proportion of ever-married or partnered women aged 15-49 who experienced physical or sexual violence from a husband/partner is justified in hitting or beating his wife/partner for any of the following five reasons: argues with him; refuses to have sex; burns the food; goes out without telling him; or when she neglects the children. Source: Demographic and Health Surveys (DHS) and Multiple Indicator Cluster Surveys (MICS) - http://data.worldbank.org/indicator/SG.VAW.REAS.ZS
83. No Data. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: first-line support (psychological first aid) - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/
