This country snapshot provides an overview of national data relating to sexual and reproductive health and rights (SRHR) throughout the life course. Realization of SRHR requires provision of comprehensive, people-centred services, that address the different elements of SRHR, and which are supported by an enabling environment, quality health systems, and meaningful community engagement. Multiple, synergistic cross-linkages exist within and between the different SRHR elements, leading to sequential outcome benefits throughout the life course.

By highlighting the national SRHR situation - including successes, areas for improvement, and data gaps - this snapshot can be used for determining priorities, planning of programmes, resource mobilization, and strengthening of health systems, service delivery and community engagement.

This snapshot uses the latest data publically available at the publication date, from reputable international sources (see endnotes for the year and source of each data point). It is acknowledged that intersectionality and people-centredness are not well reflected in available data, and that many categories of information currently collected are gender-binary.

### CONTEXT

The Sustainable Development Goals (SDGs) and Universal Health Coverage (UHC) agendas provide important opportunities to realise sexual and reproductive health and rights for all, including key and vulnerable populations, and to reimagine and enhance equitable access and quality coverage of SRH services. Delivery of comprehensive SRHR interventions throughout the life course is an essential component of UHC.

ND = No Data

Global Targets: Achieved ✅ Challenges remain 🚩 Major challenges remain 🚩
Supportive laws and policies, and access to justice are essential to eliminate stigma, discrimination, violence, coercion and exclusion in health care. Such laws and policies create a safe and supportive enabling environment that meets the SRHR needs of all people, especially key and vulnerable populations. Harmful laws need to be amended, and damaging practices need to be countered at all levels.

**Global Targets:**
- Achieved
- Challenges remain
- Major challenges remain

### Laws and policies

**People living with HIV**
- Are there laws or policies that:
  - Criminalize transmission, exposure or non-disclosure of HIV\(^7\)  \(\text{ND} \bullet\)
  - Restrict entry, stay and residence of people living with HIV\(^7\)  \(\text{ND} \bullet\)
  - Protect against discrimination on basis of HIV status\(^7\)  \(\text{ND} \bullet\)
  - Allow HIV self-testing\(^7\)  \(\text{ND} \bullet\)
  - Make oral pre-exposure prophylaxis for HIV (PrEP) available\(^7\)  \(\text{ND} \bullet\)

**Key populations**
- Are there laws or policies that:
  - Criminalize same-sex sexual behaviour\(^8\)  \(\text{No} \bullet\)
  - Criminalize sex work\(^8\)  \(\text{ND} \bullet\)
  - Allow the death penalty for people convicted of drug-related offences\(^9\)  \(\text{ND} \bullet\)
  - Support a harm reduction approach for people who use drugs\(^9\)  \(\text{ND} \bullet\)
  - Legally recognize a third gender\(^8\)  \(\text{ND} \bullet\)

### SRHR and gender-based violence

**Are there laws or policies that:**
- Allow safe abortion\(^7\)
  - To save a woman’s life  \(\text{No} \bullet\)
  - To preserve a woman’s physical health  \(\text{No} \bullet\)
  - To preserve a woman’s mental health  \(\text{No} \bullet\)
  - In case of rape  \(\text{No} \bullet\)
  - In case of incest  \(\text{No} \bullet\)
  - Owing to foetal impairment  \(\text{No} \bullet\)
  - For economic or social reasons  \(\text{No} \bullet\)
  - On request  \(\text{No} \bullet\)
- Require spousal consent for married women to access SRH services\(^7\)  \(\text{ND} \bullet\)
- Explicitly criminalize marital rape\(^7\)  \(\text{Yes} \bullet\)
- Criminalize domestic violence\(^8\)  \(\text{Yes} \bullet\)
- Criminalize sexual harassment\(^8\)  \(\text{Yes} \bullet\)
- Require provision of CSE in primary school\(^9\)  \(\text{ND} \bullet\)
- National strategy or policy on self-care interventions\(^9\)  \(\text{ND} \bullet\)

### Extent to which laws and regulations guarantee access to SRH care and education (SDG 5.6.2)\(^{10}\)

<table>
<thead>
<tr>
<th>Maternity care</th>
<th>Family planning</th>
<th>CSE</th>
<th>Sexual health</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>ND</td>
<td>ND</td>
<td>ND</td>
<td>ND</td>
<td>ND</td>
</tr>
</tbody>
</table>

### Age of Consent

**Legal age for consent to sexual intercourse\(^7\)**
- Female  \(\text{ND} \bullet\)
- Male  \(\text{ND} \bullet\)

**Legal age for marriage without parental consent\(^8\)**
- Female  \(18 \bullet\)
- Male  \(18 \bullet\)

### Laws requiring parental consent for adolescents to access SRH services\(^7\)
- Female  \(\text{ND} \bullet\)
- Male  \(\text{ND} \bullet\)

### Women’s empowerment

**Percentage of women that believe they should have final say in decisions regarding their own healthcare\(^9\)**

| Percentage | ND |

**Global Gender Gap Index\(^{42}\)**
- Ranking (out of ND countries)
- Score (1.0 = parity)
- Score  \(\text{ND} \bullet\)
- Ranking  \(\text{ND} \bullet\)

### Stigma

**Percentage of general population reporting discriminatory attitudes towards people living with HIV\(^{43}\)**

| Percentage | ND |

---

\(^{7}\) \(^{8}\) \(^{9}\) \(^{10}\) \(^{11}\) \(^{12}\) \(^{13}\) \(^{14}\) \(^{15}\)
Universal health coverage (UHC) is central to achieving better health and well-being for all people throughout the life course. Reaching UHC requires transforming health systems away from vertical and top-down approaches towards integrated, people-centred, supportive systems for health. Comprehensive SRHR, within UHC, is crucial to support progress towards advancing health and wellbeing for all.

ND = No Data

Global Targets:
- Achieved
- Challenges remain
- Major challenges remain

**Universal Health Coverage**

Coverage of essential health services (SDG 3.8.1)

Households where expenditure on health is greater than:
- 10% of income
- 25% of income

**Governance**

Legislation on universal health coverage

**Health workforce**

Skilled health professionals (per 10,000 population)

- Doctors: 61.1
- Nurses and Midwives: 82.1
- Pharmacists: 6.69

**Supply Chain**

Availability of essential medicines and commodities in Public Health facilities

**Health information**

Male condom stock-out in the past 12 months

Paper-based or electronic health information system

Antenatal care data captured in health information system

**Health financing**

Total health expenditure as a percentage of GDP

Government health expenditure as percentage of GDP

Total health expenditure per capita (USD)

Government expenditure on reproductive health per capita (USD)

**Integrated service delivery**

Health facilities delivering HIV counselling and testing with SRH services

Health facilities delivering HIV treatment and care with SRH services

Data Not Available
**SERVICE DELIVERY: REPRODUCTIVE HEALTH**

Women have the right to decide whether, when and how many children they want to have, and to do so safely, without fear of acquiring STIs including HIV, or of maternal morbidity and mortality. Women require access to a choice of modern contraceptive methods and quality antenatal, childbirth and postnatal care, safe abortion care (to the full extent of the law), post abortion care and infertility services.

ND = No Data

**Global Targets:**
- **Achieved**
- **Challenges remain**
- **Major challenges remain**

## Contraception / Family Planning

### Demand for family planning satisfied with a modern method of contraception (15-49)
- ND

### Knowledge of modern contraceptive methods
- Injection: ND
- Self injectable: ND
- Pill: ND
- Male condom: ND
- IUD: ND
- Implant: ND
- Female sterilization: ND
- Other modern methods: ND

### Unmet need for family planning (15-49)
- ND

### Use of modern contraceptive methods
- ND

## Antenatal, delivery and postnatal care

### Attending antenatal clinic
- At least once: ND
- At least 4 times: ND

### Proportion of births attended by skilled health personnel
- ND

### Births by caesarean section
- ND

### Postnatal checkup in first two days after birth
- ND

## Vertical transmission of HIV

### Pregnant women tested for HIV
- ND

### Early infant diagnosis (HIV-testing of infants at risk)
- ND

### Vertical transmission (at 12 months)
- ND

### Primary infertility among women
- ND

## Vertical transmission of syphilis

### Tested for syphilis at 1st antenatal care visit
- ND

### Percentage testing positive for syphilis who are treated
- ND

### Congenital syphilis rate (per 100,000 live births)
- ND

## Abortion

### Abortions per 1,000 women (15-49)
- ND
HIV prevention

- Condom use at last high risk sex (15-49)
- Male circumcision

95-95-95 testing and treatment cascade

- People living with HIV who know their status (15+)
- People living with HIV who are on ART (15+)
- People living with HIV on ART who achieve viral load suppression (15+)

PrEP and HIV self-testing

- Current oral pre-exposure prophylaxis for HIV (PrEP) users
- HIV self tests conducted

Syphilis

- Active syphilis among men who have sex with men
- Active syphilis among sex workers

Gender based violence

- Women experiencing physical or sexual violence in past 12 months (15-49)
- Wife agrees husband justified beating her - at least one reason specified

Care/support provided by service delivery points in cases of rape or incest

- First-line support (psychological first aid)
- Emergency contraception for women (within 5 days)
- Safe abortion (in accordance with national laws)
- Post-exposure prophylaxis for STIs and HIV (within 72 hours)

Cervical cancer

- Existence of national HPV vaccination programme
- Existence of national cervical cancer screening programme

Type of programme

Coverage of national screening programme

Global Targets: Achieved Challenges remain Major challenges remain

1. The cutoff for data included in this Infographic Snapshot is 15/04/2021. The year provided for each endnote is the date of the earliest available data with an earliest date of 2011. Where data is not available in an international data source ‘No data’ is stated. This does not mean that no data exists for this indicator but that no data was found in internationally validated data sources.

11. No Data. Indicator: SDG 3.1.1. The estimated number of women, between the age of 15-49, who die from pregnancy-related causes while pregnant or within 42 days of termination of pregnancy, per 100,000 live births. Source: SDG database - https://unstats.un.org/sdgs/indicators/database

36. No Data. Indicator: SDG 5.6.2. Extent to which countries have laws and regulations that guarantee full and equal access to women and men aged 15 years and older to SRH care, information and education. Source: SDG database - https://unstats.un.org/sdgs/indicators/database

37. No Data. Indicator: Minimum legal age of consent for heterosexual sex. Source: http://chartsbin.com/view/h0x

38. 2011. Indicator: Legal minimum age for marriage without parental consent (where an age range given, the lowest figure was used). Source: United Nations Statistics Division - https://govdata360.worldbank.org/indicators/h11830cb7

40. No Data. Indicator: Percentage of married women who say that they have the final say in own health care. Source: DHS - http://lawsandpolicies.unaids.org/

59. No Data. Indicator: SDG 3.7.1. Percentage of total demand for family planning among married or in-union women aged 15 to 49 that is satisfied with modern methods (modern contraceptive prevalence divided by total demand for family planning). Source: SDG database - https://unsustats.un.org/sdgs/indicators/database
64. No Data. Indicator: Percentage of women aged 15 to 49 with a live birth in a given time period that received antenatal care provided by skilled health personnel (doctor, nurse or midwife) at least once during pregnancy Source: UNICEF antenatal care coverage database - http://data.unicef.org/maternal-health/antenatal-care.html
65. No Data. Indicator: Percentage of women aged 15 to 49 with a live birth in a given time period that received antenatal care four or more times Source: UNICEF. Antenatal care coverage database - http://data.unicef.org/maternal-health/antenatal-care.html
70. No Data. Indicator: Percentage of infants born to women living with HIV receiving a virological test for HIV within two months of birth. Source: UNAIDS estimates - https://aidsinfo.unaids.org
73. No Data. Indicator: Percentage of women accessing antenatal care services who were tested for syphilis at first antenatal care visit. Source: WHO Global Health Observatory data repository - http://apps.who.int/gho/data/view.main.23610
75. No Data. Indicator: Congenital syphilis rate per 100,000 live births. Source: WHO Global Health Observatory data repository - http://apps.who.int/gho/data/view.main.41464
80. No Data. Indicator: People living with HIV who know their status who are on ART (15+). Source: UNAIDS estimates - https://aidsinfo.unaids.org
86. No Data. Indicator: SDG 5.2.1. Proportion of ever-married or partnered women aged 15–49 who experienced physical or sexual violence from a current or former intimate partner in the past 12 months. Source: SDG database - https://unsustats.un.org/sdgs/indicators/database
87. No Data. Indicator: Percentage of women ages 15–49 who believe a husband/partner is justified in hitting or beating his wife/partner for any of the following five reasons: argues with him; refuses to have sex; burns the food; goes out without telling him; or when she neglects the children. Source: Demographic and Health Surveys (DHS) and Multiple Indicator Cluster Surveys (MICS) - http://data.worldbank.org/indicator/SG.VAW.REAS.ZS
88. No Data. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: first-line support (psychological first aid) - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/
