This country snapshot provides an overview of national data relating to sexual and reproductive health and rights (SRHR) throughout the life course. Realization of SRHR requires provision of comprehensive, people-centred services, that address the different elements of SRHR, and which are supported by an enabling environment, quality health systems, and meaningful community engagement. Multiple, synergistic cross-linkages exist within and between the different SRHR elements, leading to sequential outcome benefits throughout the life course.

By highlighting the national SRHR situation - including successes, areas for improvement, and data gaps - this snapshot can be used for determining priorities, planning of programmes, resource mobilization, and strengthening of health systems, service delivery and community engagement.

This snapshot uses the latest data publically available at the publication date, from reputable international sources (see endnotes for the year and source of each data point). It is acknowledged that intersectionality and people-centredness are not well reflected in available data, and that many categories of information currently collected are gender-binary.

*Reissued for technical reasons on 29 April 2022*
The Sustainable Development Goals (SDGs) and Universal Health Coverage (UHC) agendas provide important opportunities to realise sexual and reproductive health and rights for all, including key and vulnerable populations, and to reimagine and enhance equitable access and quality coverage of SRH services. Delivery of comprehensive SRHR interventions throughout the life course is an essential component of UHC.

**Demographic data**
- **Population size**: 8.0m
- **Female**: 4.0m
- **Male**: 4.0m
- **Life expectancy at birth**
  - Female: 61.9
  - Male: 59.6
- **Population age distribution**
  - 0-14: 40.3%
  - 15-24: 20.4%
  - 25-49: 29.4%
  - 50+: 9.9%

**Sexual and Reproductive Health**
- **Total fertility rate**: 4.3 births per woman
- **Adolescent birth rate**: 112.8 per 1,000 women aged 15-19
- **Median age at first sex among young people (20-24)**
  - Male: 18.1
  - Female: 16.5
- **Maternal mortality ratio**: 1120 per 100,000 live births
- **Maternal mortality due to HIV**: ND
- **Neonatal mortality rate**: 31.2 per 1000 live births

**HIV**
- **Number of new HIV infections**: 17
- **Number of people living with HIV**: 18
- **Number of AIDS related deaths**: 18

**Global Targets:**
- Achieved
- Challenges remain
- Major challenges remain

ENABLING ENVIRONMENT

Supportive laws and policies, and access to justice are essential to eliminate stigma, discrimination, violence, coercion and exclusion in health care. Such laws and policies create a safe and supportive enabling environment that meets the SRHR needs of all people, especially key and vulnerable populations. Harmful laws need to be amended, and damaging practices need to be countered at all levels.

ND = No Data

Global Targets: Achieved Challenges remain Major challenges remain

Laws and policies

People living with HIV
Are there laws or policies that:
- Criminalize transmission, exposure or non-disclosure of HIV
- Restrict entry, stay and residence of people living with HIV
- Protect against discrimination on basis of HIV status
- Allow HIV self-testing
- Make oral pre-exposure prophylaxis for HIV (PrEP) available

Key populations
Are there laws or policies that:
- Criminalize same-sex sexual behaviour
- Criminalize sex work
- Allow the death penalty for people convicted of drug-related offences
- Support a harm reduction approach for people who use drugs
- Legally recognize a third gender

SRHR and gender-based violence
Are there laws or policies that:
- Allow safe abortion
  - To save a woman’s life
  - To preserve a woman’s physical health
  - To preserve a woman’s mental health
  - In case of rape
  - In case of incest
  - Owing to foetal impairment
  - For economic or social reasons
  - On request
- Require spousal consent for married women to access SRH services
- Explicitly criminalize marital rape
- Criminalize domestic violence
- Criminalize sexual harassment
- Require provision of CSE in primary school
- National strategy or policy on self-care interventions

Extent to which laws and regulations guarantee access to SRH care and education (SDG 5.6.2)

Women have the right to decide whether, when and how many children they want to have, and to do so safely, without fear of acquiring STIs including HIV, or of maternal morbidity and mortality. Women require access to a choice of modern contraceptive methods and quality antenatal, childbirth and postnatal care, safe abortion care (to the full extent of the law), post abortion care and infertility services.

**Contraception / Family Planning**

- **Demand for family planning satisfied with a modern method of contraception (15-49)**: 53.0%
- **Knowledge of modern contraceptive methods**: 97.4%
- **Use of modern contraceptive methods (women 15-49)**: 24.8%, 20.8%
- **Modern contraceptive method (women 15-49)**:
  - Injection: 42.8%
  - Self injectable: ND
  - Pill: 19.7%
  - Male condom: 0.5%
  - IUD: 1.9%
  - Implant: 32.7%
  - Female sterilization: 1.0%
  - Other modern methods: 1.4%

**Antenatal, delivery and postnatal care**

- **Attending antenatal clinic at least once**: 97.9%
- **Proportion of births attended by skilled health personnel**: 86.9%
- **Births by caesarean section**: 3.0%
- **Postnatal checkup in first two days after birth**: 86.0%

**Vertical transmission of HIV**

- **Pregnant women tested for HIV**: 94.5%
- **Early infant diagnosis (HIV-testing of infants at risk)**: 8.5%
- **Vertical transmission (at 12 months)**: 17.8%
- **Primary infertility among women**: ND

**Vertical transmission of syphilis**

- **Tested for syphilis at 1st antenatal care visit**: 50.2%
- **Percentage testing positive for syphilis who are treated**: 96.0%
- **Congenital syphilis rate (per 100,000 live births)**: ND
- **Abortion per 1,000 women (15-49)**: ND
## HIV prevention
