This country snapshot provides an overview of national data relating to sexual and reproductive health and rights (SRHR) throughout the life course. Realization of SRHR requires provision of comprehensive, people-centred services, that address the different elements of SRHR, and which are supported by an enabling environment, quality health systems, and meaningful community engagement. Multiple, synergistic cross-linkages exist within and between the different SRHR elements, leading to sequential outcome benefits throughout the life course.

By highlighting the national SRHR situation - including successes, areas for improvement, and data gaps - this snapshot can be used for determining priorities, planning of programmes, resource mobilization, and strengthening of health systems, service delivery and community engagement.

This snapshot uses the latest data publically available at the publication date, from reputable international sources (see endnotes for the year and source of each data point). It is acknowledged that intersectionality and people-centredness are not well reflected in available data, and that many categories of information currently collected are gender-binary.
Demographic data

Population size: 15.9m
- Female: 8.0m
- Male: 7.9m

Life expectancy at birth:
- Female: 59.2
- Male: 54.0

Population age distribution:
- 0-14: 46.1%
- 15-24: 21.1%
- 25-49: 23.6%
- 50+: 9.2%

Sexual and Reproductive Health

Total fertility rate: 6.1 births per woman

Adolescent birth rate:
- 100.1 per 1,000 women aged 15-19

Median age at first sex among young people (20-24):
- Male: ND
- Female: ND

HIV

Number of new HIV infections: 17

Number of people living with HIV: 18

Number of AIDS related deaths: 19

HIV incidence per 1,000 population (15+): 0.04

HIV prevalence among adults (15-49): 0.1%
ENABLING ENVIRONMENT

Supportive laws and policies, and access to justice are essential to eliminate stigma, discrimination, violence, coercion and exclusion in health care. Such laws and policies create a safe and supportive enabling environment that meets the SRHR needs of all people, especially key and vulnerable populations. Harmful laws need to be amended, and damaging practices need to be countered at all levels.

</table>

Score (1.0 = parity)
Universal health coverage (UHC) is central to achieving better health and well-being for all people throughout the life course. Reaching UHC requires transforming health systems away from vertical and top-down approaches towards integrated, people-centred, supportive systems for health. Comprehensive SRHR, within UHC, is crucial to support progress towards advancing health and wellbeing for all.

ND = No Data

**Global Targets:**
- Achieved
- Challenges remain
- Major challenges remain

### Universal Health Coverage

- **Coverage of essential health services (SDG 3.8.1)**: [Visual representation]
  - 25

- **Catastrophic health spending (SDG 3.8.2)**
  - Households where expenditure on health is greater than:
    - 10% of income
    - 25% of income
  - [Graphs indicating ND for both]

### Governance

- **Legislation on universal health coverage**: [Visual representation]
  - No

### Health workforce

- **Skilled health professionals (per 10,000 population)**
  - **Doctors**: 0.2
  - **Nurses and Midwives**: 1.1
  - **Pharmacists**: ND

### Supply Chain

- **Availability of essential medicines and commodities in Public Health facilities**: ND
- **Male condom stock-out in the past 12 months**: ND

### Health information

- **Paper-based or electronic health information system**: Both
- **Antenatal care data captured in health information system**: ND

### Health financing

- **Total health expenditure as a percentage of GDP**: ND
- **Government health expenditure as percentage of GDP**: ND
- **Total health expenditure per capita (USD)**: ND
- **Government expenditure on reproductive health per capita (USD)**: ND

### Integrated service delivery

- **Health facilities delivering HIV counselling and testing with SRH services**: Data Not Available
- **Health facilities delivering HIV treatment and care with SRH services**: Data Not Available
Women have the right to decide whether, when and how many children they want to have, and to do so safely, without fear of acquiring STIs including HIV, or of maternal morbidity and mortality. Women require access to a choice of modern contraceptive methods and quality antenatal, childbirth and postnatal care, safe abortion care (to the full extent of the law), post abortion care and infertility services.

**Contraception / Family Planning**

- Demand for family planning satisfied with a modern method of contraception (15-49)\(^5\): 2.1%
- Unmet need for family planning (15-49)\(^2\): 36.6%

**Knowledge of modern contraceptive methods\(^10\)**

- Injection: 11.4%
- Self injectable: ND
- Pill: 45.5%
- Male condom: 3.4%
- IUD: 5.7%
- Implant: 22.7%
- Female sterilization: 0%
- Other modern methods: 11.4%

**Modern contraceptive method (women 15-49)\(^9\)**

- Injection
- Self injectable
- Pill
- Male condom
- IUD
- Implant
- Female sterilization
- Other modern methods

**Antenatal, delivery and postnatal care**

- Attending antenatal clinic: 31.1%
- Proportion of births attended by skilled health personnel\(^6\): 31.9%
- Births by caesarean section\(^57\): 1.7%
- Postnatal checkup in first two days after birth\(^64\): 10.5%

**Vertical transmission of HIV**

- Pregnant women tested for HIV\(^6\): 29.7%
- Early infant diagnosis (HIV-testing of infants at risk)\(^68\): ND
- Vertical transmission (at 12 months)\(^71\): 31.9%
- Primary infertility among women\(^72\): ND

**Vertical transmission of syphilis**

- Tested for syphilis at 1st antenatal care visit\(^73\): 10.6%
- Percentage testing positive for syphilis who are treated\(^7\): 46.7%
- Congenital syphilis rate\(^73\) (per 100,000 live births): ND

**Abortion**

- Abortions per 1,000 women (15-49)\(^76\): ND
Sexual health is a state of physical, emotional, mental and social well-being in relation to sexuality. It requires a positive and respectful approach to sexuality and sexual relationships, as well as the possibility of having pleasurable and safe sexual experiences, free of coercion, stigma, discrimination and violence.

**Global Targets:**
- Achieved
- Challenges remain
- Major challenges remain

### HIV prevention
- Condom use at last high risk sex (15-49)\(^7\)
  - ND
- Male circumcision\(^8\)
  - ND

### 95-95-95 testing and treatment cascade
- People living with HIV who know their status (15+)\(^9\)
  - Female ND
  - Male ND
- People living with HIV who are on ART (15+)\(^10\)
  - Female 38%
  - Male 31%
- People living with HIV on ART who achieve viral load suppression (15+)\(^1\)
  - Female 28%
  - Male 22%

### PrEP and HIV self-testing
- Current oral pre-exposure prophylaxis for HIV (PrEP) users\(^2\)
  - ND
- HIV self tests conducted\(^3\)
  - ND

### Syphilis
- Active syphilis among men who have sex with men\(^4\)
  - ND
- Active syphilis among sex workers\(^5\)
  - 2.7%

### Gender based violence
- Women experiencing physical or sexual violence in past 12 months (15-49)\(^6\)
  - ND
- Wife agrees husband justified beating her - at least one reason specified\(^7\)
  - 75.7%

### Care/support provided by service delivery points in cases of rape or incest
- First-line support (psychological first aid)\(^8\)
  - ND
- Emergency contraception for women (within 5 days)\(^9\)
  - ND
- Safe abortion (in accordance with national laws)\(^10\)
  - ND
- Post-exposure prophylaxis for STIs and HIV (within 72 hours)\(^11\)
  - ND

### Cervical cancer
- Existence of national HPV vaccination programme\(^12\)
  - No
- Existence of national cervical cancer screening programme\(^13\)
  - Yes
- Type of programme\(^14\)
  - ND
- Coverage of national screening programme\(^15\)
  - ND
Harmful practices

Girls married before 18: 35.5%

Female genital mutilation / cutting: 99.2%

Comprehensive Sexuality Education

Primary schools fully implementing national CSE policy: ND

Secondary schools fully implementing national CSE policy: ND

Adolescent sexual health

Had multiple partners and used a condom at last sex (15-19): ND

Correct knowledge of HIV prevention (15-24): ND

Key populations

Men who have sex with men: ND

Sex workers: 3,700

People who inject drugs: ND

Transgender people: ND

Prisoners: ND

Service Delivery: Sexual and Reproductive Health for All

Everyone has the right to access sexual and reproductive health services and information, free of force or coercion, and irrespective of age, sex, sexual orientation, gender identity, ability, socio-economic or occupational status.

Key populations:

Population size estimate | HIV prevalence | Knowledge of HIV status | Condom use at last sex
--- | --- | --- | ---
Men who have sex with men | ND | ND | ND
Sex workers | 3,700 | 3.4% | ND | 41.5%
People who inject drugs | ND | ND | ND | ND
Transgender people | ND | ND | ND | ND
Prisoners | ND | 0.4% | ND | ND
1. The cutoff for data included in this Infographic Snapshot is 15/04/2021. The year provided for each endnote is the date of the latest available data with an earliest date of 2011. Where data is not available in an international data source ‘No data’ is stated. This does not mean that no data exists for this indicator but that no data was found in internationally validated data sources.

36. 2019. Indicator: SDG 5.6.2. Extent to which countries have laws and regulations that guarantee full and equal access to women and men aged 15 years and older to SRH care, information and education. Source: SDG database - https://unstats.un.org/sdgs/indicators/database.

90. No Data. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Emergency contraception for women who seek services within five days - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/
91. No Data. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Safe abortion if a woman becomes pregnant as a result of rape in accordance with national law (according to national authorities). Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/
98. No Data. Indicator: Percentage of primary schools that have fully implemented education policies on life skills-based HIV and sexuality education. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/
100. No Data. Indicator: Percentage of adolescents (aged 15–19) who reported having sexual intercourse with more than one partner in the last 12 months and who reported the use of a condom during their last sexual intercourse. Source: UNICEF global databases - https://data.unicef.org/topic/hiv-aids/adolescents-young-people/
102. It is recognised that there are also a number of vulnerable populations at greater risk of poor HIV or SRH outcomes such as migrants/refugees, indigenous populations, people with disabilities, people experiencing homelessness etc. These are not included in this snapshot due to a lack of data.
104. No Data. Indicator: Percentage of men who have sex with men who are living with HIV. Source: UNAIDS estimates - https://aidsinfo.unaids.org
105. No Data. Indicator: Percentage of men who have sex with men who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org
106. No Data. Indicator: Percentage of men reporting the use of a condom the last time they had anal sex with a male partner. Source: UNAIDS estimates - https://aidsinfo.unaids.org
112. No Data. Indicator: Percentage of people who inject drugs who are living with HIV. Source: UNAIDS estimates - https://aidsinfo.unaids.org
113. No Data. Indicator: Percentage of people who inject drugs who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org
114. No Data. Indicator: Percentage of people who inject drugs reporting the use of a condom the last time they had sexual intercourse. Source: UNAIDS estimates - https://aidsinfo.unaids.org
117. No Data. Indicator: Percentage of transgender people who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org
118. No Data. Indicator: Percentage of transgender people reporting the use of a condom the last time they had sexual intercourse. Source: UNAIDS estimates - https://aidsinfo.unaids.org
120. 2019. Indicator: Percentage of prisoners who are living with HIV. Source: UNAIDS estimates - https://aidsinfo.unaids.org
121. No Data. Indicator: Percentage of prisoners who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org
122. No Data. Indicator: Percentage of prisoners reporting the use of a condom the last time they had sexual intercourse. Source: UNAIDS estimates - https://aidsinfo.unaids.org
