This country snapshot provides an overview of national data relating to sexual and reproductive health and rights (SRHR) throughout the life course. Realization of SRHR\(^1\) requires provision of comprehensive, people-centred services, that address the different elements of SRHR, and which are supported by an enabling environment, quality health systems, and meaningful community engagement. Multiple, synergistic cross-linkages exist within and between the different SRHR elements, leading to sequential outcome benefits throughout the life course.\(^2\)

By highlighting the national SRHR situation - including successes, areas for improvement, and data gaps - this snapshot can be used for determining priorities, planning of programmes, resource mobilization, and strengthening of health systems, service delivery and community engagement.

This snapshot uses the latest data publically available at the publication date\(^1\), from reputable international sources (see endnotes for the year and source of each data point). It is acknowledged that intersectionality and people-centredness are not well reflected in available data, and that many categories of information currently collected are gender-binary.
 CONTEXT

The Sustainable Development Goals (SDGs) and Universal Health Coverage (UHC) agendas provide important opportunities to realise sexual and reproductive health and rights for all, including key and vulnerable populations, and to reimagine and enhance equitable access and quality coverage of SRH services. Delivery of comprehensive SRHR interventions throughout the life course is an essential component of UHC.

HIV incidence per 1,000 population (15+) 5.54

HIV prevalence among adults (15-49) 19.0%
ENABLING ENVIRONMENT

Supportive laws and policies, and access to justice are essential to eliminate stigma, discrimination, violence, coercion and exclusion in health care. Such laws and policies create a safe and supportive enabling environment that meets the SRHR needs of all people, especially key and vulnerable populations. Harmful laws need to be amended, and damaging practices need to be countered at all levels.

ND = No Data

Global Targets: Achieved □ Challenges remain □ Major challenges remain □

### Laws and policies

**People living with HIV**

Are there laws or policies that:

- Criminalize transmission, exposure or non-disclosure of HIV\(^7\)  Partial □
- Restrict entry, stay and residence of people living with HIV\(^9\)  No □
- Protect against discrimination on basis of HIV status\(^2\)  Yes □
- Allow HIV self-testing\(^2\)  Yes □
- Make oral pre-exposure prophylaxis for HIV (PrEP) available\(^2\)  Yes □

### Key populations

Are there laws or policies that:

- Criminalize same-sex sexual behaviour\(^4\)  No □
- Criminalize sex work\(^5\)  Yes □
- Allow the death penalty for people convicted of drug-related offences\(^6\)  No □
- Support a harm reduction approach for people who use drugs\(^7\)  No □
- Legally recognize a third gender\(^8\)  Yes □

### SRHR and gender-based violence

Are there laws or policies that:

- Allow safe abortion\(^9\)  Yes □
- To save a woman’s life  Yes □
- To preserve a woman’s physical health  Yes □
- To preserve a woman’s mental health  Yes □
- In case of rape  Yes □
- In case of incest  Yes □
- Owing to foetal impairment  Yes □
- For economic or social reasons  Yes □
- On request  Yes □
- Require spousal consent for married women to access SRH services\(^3\)  No □
- Explicitly criminalize marital rape\(^3\)  Yes □
- Criminalize domestic violence\(^3\)  Yes □
- Criminalize sexual harassment\(^3\)  Yes □
- Require provision of CSE in primary school\(^4\)  Yes □

**National strategy or policy on self-care interventions\(^3\)  ND □

### Extent to which laws and regulations guarantee access to SRH care and education (SDG 5.6.2)\(^9\)

<table>
<thead>
<tr>

<td>ND</td>
</tr>
</tbody>
</table>

### Laws requiring parental consent for adolescents to access SRH services\(^9\)  No □

### Women’s empowerment

Percentage of women that believe they should have final say in decisions regarding their own healthcare\(^4\)

- Female 90.8%
- Male 64.9%

### Global Gender Gap Index\(^4\)

- Ranking (out of 156 countries)
- Score (1.0 = parity)
- Score 0.8
- Ranking 18

### Stigma

Percentage of general population reporting discriminatory attitudes towards people living with HIV\(^3\)

- 12.6%
Universal health coverage (UHC) is central to achieving better health and well-being for all people throughout the life course. Reaching UHC requires transforming health systems away from vertical and top-down approaches towards integrated, people-centred, supportive systems for health. Comprehensive SRHR, within UHC, is crucial to support progress towards advancing health and well-being for all.

Global Targets: Achieved  Challenges remain  Major challenges remain

Universal Health Coverage

Coverage of essential health services (SDG 3.8.1)

Catastrophic health spending (SDG 3.8.2)

Households where expenditure on health is greater than:
- 10% of income
- 25% of income

Governance

Legislation on universal health coverage

No

Health workforce

Skilled health professionals (per 10,000 population)
- Doctors
- Nurses and Midwives
- Pharmacists

Supply Chain

Availability of essential medicines and commodities in Public Health facilities

No

Health information

Antenatal care data captured in health information system

Both

Health financing

Total health expenditure as a percentage of GDP

8.3%

Government health expenditure as percentage of GDP

4.5%

Total health expenditure per capita (USD)

$526

Government expenditure on reproductive health per capita (USD)

ND

Integrated service delivery

Health facilities delivering HIV counselling and testing with SRH services

All

Health facilities delivering HIV treatment and care with SRH services

All
Women have the right to decide whether, when and how many children they want to have, and to do so safely, without fear of acquiring STIs including HIV, or of maternal morbidity and mortality. Women require access to a choice of modern contraceptive methods and quality antenatal, childbirth and postnatal care, safe abortion care (to the full extent of the law), post abortion care and infertility services.

**Contraception / Family Planning**

- Demand for family planning satisfied with a modern method of contraception (15-49): 79.7%
- Knowledge of modern contraceptive methods: 99.7%
- Modern contraceptive method (women 15-49):
  - Injection: 44.2%
  - Self injectable: ND
  - Pill: 15.5%
  - Male condom: 16.3%
  - IUD: 2.2%
  - Implant: 6.1%
  - Female sterilization: 14.2%
  - Other modern methods: 1.5%
- Unmet need for family planning (15-49): 14.9%
- Use of modern contraceptive methods (women 15-49): 54.0%

**Antenatal, delivery and postnatal care**

- Attending antenatal clinic: 93.7%
- Proportion of births attended by skilled health personnel: 96.7%
- Births by caesarean section: 26.2%
- Postnatal checkup in first two days after birth: 83.6%

**Vertical transmission of HIV**

- Pregnant women tested for HIV: 90.1%
- Early infant diagnosis (HIV-testing of infants at risk): 83.3%
- Vertical transmission (at 12 months): 3.3%
- Primary infertility among women: ND

**Vertical transmission of syphilis**

- Tested for syphilis at 1st antenatal care visit: ND
- Percentage testing positive for syphilis who are treated: 71.7%
- Congenital syphilis rate (per 100,000 live births): ND

**Abortion**

- Abortions per 1,000 women (15-49): ND

**Service Delivery: Reproductive Health**

ND = No Data
**SERVICE DELIVERY: SEXUAL HEALTH**

Sexual health is a state of physical, emotional, mental and social well-being in relation to sexuality. It requires a positive and respectful approach to sexuality and sexual relationships, as well as the possibility of having pleasurable and safe sexual experiences, free of coercion, stigma, discrimination and violence.

---

**HIV prevention**
- Condom use at last high risk sex (15-49)\(^7\)
  - ND
- Male circumcision\(^7\)
  - ND

**95-95-95 testing and treatment cascade**
- People living with HIV who know their status (15+)*\(^7\)
  - Female: 94%
  - Male: 91%
- People living with HIV who know their status who are on ART (15+)*\(^10\)
  - Female: 75%
  - Male: 63%
- People living with HIV on ART who achieve viral load suppression (15+)*\(^11\)
  - Female: 69%
  - Male: 58%

**PrEP and HIV self-testing**
- Current oral pre-exposure prophylaxis for HIV (PrEP) users*\(^83\)
  - 8,184

**Syphilis**
- Active syphilis among men who have sex with men*\(^44\)
  - ND
- Active syphilis among sex workers*\(^35\)
  - ND

**Gender based violence**
- Women experiencing physical or sexual violence in past 12 months (15-49)*\(^96\)
  - ND
- Wife agrees husband justified beating her - at least one reason specified*\(^97\)
  - 5.5%

**Care/support provided by service delivery points in cases of rape or incest**
- First-line support (psychological first aid)*\(^88\)
  - Yes
- Emergency contraception for women (within 5 days)*\(^85\)
  - Yes
- Safe abortion (in accordance with national laws)*\(^80\)
  - Yes
- Post-exposure prophylaxis for STIs and HIV (within 72 hours)*\(^7\)
  - Yes

**Cervical cancer**
- Existence of national HPV vaccination programme*\(^92\)
  - Yes
- Existence of national cervical cancer screening programme*\(^93\)
  - Yes
- Type of programme*\(^94\)
  - Opportunistic screening
- Coverage of national screening programme*\(^95\)
  - 50-70%
