This country snapshot provides an overview of national data relating to sexual and reproductive health and rights (SRHR) throughout the life course. Realization of SRHR requires provision of comprehensive, people-centred services, that address the different elements of SRHR, and which are supported by an enabling environment, quality health systems, and meaningful community engagement. Multiple, synergistic cross-linkages exist within and between the different SRHR elements, leading to sequential outcome benefits throughout the life course.

By highlighting the national SRHR situation - including successes, areas for improvement, and data gaps - this snapshot can be used for determining priorities, planning of programmes, resource mobilization, and strengthening of health systems, service delivery and community engagement.

This snapshot uses the latest data publically available at the publication date, from reputable international sources (see endnotes for the year and source of each data point). It is acknowledged that intersectionality and people-centredness are not well reflected in available data, and that many categories of information currently collected are gender-binary.

*Reissued for technical reasons on 29 April 2022*
Demographic data

Population size: 9.5m
Female: 4.7m
Male: 4.8m

Life expectancy at birth:
Female: 71.6
Male: 67.6

Population age distribution:
0-14: 37.3%
15-24: 17.2%
25-49: 32.4%
50+: 13.1%

Sexual and Reproductive Health

Total fertility rate: 3.6 births per woman

Adolescent birth rate: 57.1 per 1,000 women aged 15-19

Median age at first sex among young people (20-24): ND

Young women (20-24) married before age 18: 8.7%

Maternal mortality ratio: 17 per 100,000 live births

Maternal mortality due to HIV: ND

Neonatal mortality rate: 15.0 per 1,000 live births

HIV

Number of new HIV infections:
Child (0-14): <500
Female (15-24): <100
Male (15-24): <200
Female (25-49): <200
Male (25-49): <1,000
Female (50+): <100
Male (50+): <100
Total: 1,600

Number of people living with HIV:
Child (0-14): <1,000
Female (15-24): <500
Male (15-24): <1,000
Female (25-49): 2,600
Male (25-49): 7,800
Female (50+): <500
Male (50+): 1,100
Total: 14,000

Number of AIDS related deaths:
Child (0-14): <200
Female (15-24): <100
Male (15-24): <100
Female (25-49): <100
Male (25-49): <200
Female (50+): <100
Male (50+): <100
Total: <500

HIV incidence per 1,000 population (15+): 0.21

HIV prevalence among adults (15-49): 0.2%

CONTEXT

The Sustainable Development Goals (SDGs) and Universal Health Coverage (UHC) agendas provide important opportunities to realise sexual and reproductive health and rights for all, including key and vulnerable populations, and to reimagine and enhance equitable access and quality coverage of SRH services. Delivery of comprehensive SRHR interventions throughout the life course is an essential component of UHC.

ND = No Data

Global Targets:
Achieved • Challenges remain • Major challenges remain
## ENABLING ENVIRONMENT

Supportive laws and policies, and access to justice are essential to eliminate stigma, discrimination, violence, coercion and exclusion in health care. Such laws and policies create a safe and supportive enabling environment that meets the SRHR needs of all people, especially key and vulnerable populations. Harmful laws need to be amended, and damaging practices need to be countered at all levels.

Universal Health Coverage

Coverage of essential health services (SDG 3.8.1)

- 68%

Catastrophic health spending (SDG 3.8.2)

Households where expenditure on health is greater than:

- 10% of income
- 25% of income

Governance

Legislation on universal health coverage
- No

Health workforce

Skilled health professionals (per 10,000 population)

- Doctors: 17.2
- Nurses and Midwives: 47.5
- Pharmacists: ND

Supply Chain

Availability of essential medicines and commodities in Public Health facilities
- ND

Health information

Antenatal care data captured in health information system
- Yes

Health financing

- Total health expenditure as a percentage of GDP: 7.2%
- Government health expenditure as percentage of GDP: 2.0%
- Total health expenditure per capita (USD): $59.8
- Government expenditure on reproductive health per capita (USD): $3.8

Integrated service delivery

Health facilities delivering HIV counselling and testing with SRH services
- All

Health facilities delivering HIV treatment and care with SRH services
- All

ND = No Data

Universal health coverage (UHC) is central to achieving better health and well-being for all people throughout the life course. Reaching UHC requires transforming health systems away from vertical and top-down approaches towards integrated, people-centred, supportive systems for health. Comprehensive SRHR, within UHC, is crucial to support progress towards advancing health and wellbeing for all.
**Service Delivery: Reproductive Health**

Women have the right to decide whether, when and how many children they want to have, and to do so safely, without fear of acquiring STIs including HIV, or of maternal morbidity and mortality. Women require access to a choice of modern contraceptive methods and quality antenatal, childbirth and postnatal care, safe abortion care (to the full extent of the law), post abortion care and infertility services.

**Contraception / Family Planning**

<table>
<thead>
<tr>
<th>Demand for family planning satisfied with a modern method of contraception (15-49)</th>
<th>Knowledge of modern contraceptive methods</th>
<th>Modern contraceptive method (women 15-49)</th>
</tr>
</thead>
<tbody>
<tr>
<td>52.1%</td>
<td>Injection: 4.8%</td>
<td>ND</td>
</tr>

- Achieved
- Challenges remain
- Major challenges remain
# Sexual Health

**HIV prevention**

Condom use at last high risk sex (15-49) [77]

- Female: 97%
- Male: 48%

Male circumcision [78]

- Female: ND
- Male: ND

**95-95-95 testing and treatment cascade**

- **People living with HIV who know their status (15+) [79]**
  - Female: 97%
  - Male: 48%

- **People living with HIV who are on ART (15+) [80]**
  - Female: 86%
  - Male: 35%

- **People living with HIV on ART who achieve viral load suppression (15+) [81]**
  - Female: 65%
  - Male: 25%

**PrEP and HIV self-testing**

- Current oral pre-exposure prophylaxis for HIV (PrEP) users [82]
  - ND

- HIV self tests conducted [83]
  - 3,068

**Syphilis**

- Active syphilis among men who have sex with men [84]
  - 6.0%

- Active syphilis among sex workers [85]
  - 0.7%

**Gender based violence**

- Women experiencing physical or sexual violence in past 12 months (15-49) [86]
  - 19%

- Wife agrees husband justified beating her - at least one reason specified [87]
  - 63.6%

**Care/support provided by service delivery points in cases of rape or incest**

- First-line support (psychological first aid) [88]
  - Yes
- Emergency contraception for women (within 5 days) [89]
  - Yes
- Safe abortion (in accordance with national laws) [90]
  - Yes
- Post-exposure prophylaxis for STIs and HIV (within 72 hours) [91]
  - Yes

**Cervical cancer**

- Existence of national HPV vaccination programme [92]
  - No
- Existence of national cervical cancer screening programme [93]
  - No
- Type of programme [94]
  - None
- Coverage of national screening programme [95]
  - 0%

**Global Targets:**

- Achieved
- Challenges remain
- Major challenges remain

**SERVICE DELIVERY: SEXUAL AND REPRODUCTIVE HEALTH FOR ALL**

Everyone has the right to access sexual and reproductive health services and information, free of force or coercion, and irrespective of age, sex, sexual orientation, gender identity, ability, socio-economic or occupational status.
1. The cutoff for data included in this Infographic Snapshot is 15/04/2021. The year provided for each endnote is the date of the latest available data with an earliest date of 2011. Where data is not available in an international data source ‘No data’ is stated. This does not mean that no data exists for this indicator but that no data was found in internationally validated data sources.

11. 2017. Indicator: SDG3.1.1. The estimated number of women, between the age of 15-49, who die from pregnancy-related causes while pregnant or within 42 days of termination of pregnancy, per 100,000 live births. Source: SDG database - https://unstats.un.org/sdgs/dsd/indicators/database

36. No Data. Indicator: SDG 5.6.2. Extent to which countries have laws and regulations that guarantee full and equal access to women and men aged 15 years and older to SRH care, information and education. Source: SDG database - https://unstats.un.org/sdgs/dsd/indicators/database
