This country snapshot provides an overview of national data relating to sexual and reproductive health and rights (SRHR) throughout the life course. Realization of SRHR requires provision of comprehensive, people-centred services, that address the different elements of SRHR, and which are supported by an enabling environment, quality health systems, and meaningful community engagement. Multiple, synergistic cross-linkages exist within and between the different SRHR elements, leading to sequential outcome benefits throughout the life course.

By highlighting the national SRHR situation - including successes, areas for improvement, and data gaps - this snapshot can be used for determining priorities, planning of programmes, resource mobilization, and strengthening of health systems, service delivery and community engagement.

This snapshot uses the latest data publicly available at the publication date, from reputable international sources (see endnotes for the year and source of each data point). It is acknowledged that intersectionality and people-centredness are not well reflected in available data, and that many categories of information currently collected are gender-binary.

*Reissued for technical reasons on 29 April 2022*
Demographic data

- Population size: 0.10m
  - Female: 0.05m
  - Male: 0.05m

Life expectancy at birth:
- Female: 75.6
- Male: 69.8

Population age distribution:
- 0-14: 34.8%
- 15-24: 20.0%
- 25-49: 28.3%
- 50+: 17.0%

Sexual and Reproductive Health

- Total fertility rate: 3.6 births per woman
- Adolescent birth rate: 14.7 per 1,000 women aged 15-19
- Median age at first sex among young people (20-24): ND
- Maternal mortality ratio: 52 per 100,000 live births
- Maternal mortality due to HIV: ND
- Neonatal mortality rate: 7.4 per 1000 live births

HIV

- Number of new HIV infections: ND
- Number of people living with HIV: ND
- Number of AIDS related deaths: ND

- Child (0-14)
- Female (15-24)
- Male (15-24)
- Female (25-49)
- Male (25-49)
- Female (50+)
- Male (50+)

HIV incidence per 1,000 population (15+): ND

HIV prevalence among adults (15-49): ND

Context

The Sustainable Development Goals (SDGs) and Universal Health Coverage (UHC) agendas provide important opportunities to realise sexual and reproductive health and rights for all, including key and vulnerable populations, and to reimagine and enhance equitable access and quality coverage of SRH services. Delivery of comprehensive SRHR interventions throughout the life course is an essential component of UHC.

ND = No Data
ENABLING ENVIRONMENT

Supportive laws and policies, and access to justice are essential to eliminate stigma, discrimination, violence, coercion and exclusion in health care. Such laws and policies create a safe and supportive enabling environment that meets the SRHR needs of all people, especially key and vulnerable populations. Harmful laws need to be amended, and damaging practices need to be countered at all levels.

ND = No Data

Global Targets: Achieved  Challenges remain  Major challenges remain

### Laws and policies

#### People living with HIV

<table>
<thead>
<tr>
<th>Are there laws or policies that:</th>
<th>Impact on integrated SRHR:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Criminalize transmission, exposure or non-disclosure of HIV</td>
<td>Supportive</td>
</tr>
<tr>
<td>Restrict entry, stay and residence of people living with HIV</td>
<td>Partial</td>
</tr>
<tr>
<td>Protect against discrimination on basis of HIV status</td>
<td>Punitive</td>
</tr>
<tr>
<td>Allow HIV self-testing</td>
<td></td>
</tr>
<tr>
<td>Make oral pre-exposure prophylaxis for HIV (PrEP) available</td>
<td></td>
</tr>
</tbody>
</table>

#### SRHR and gender-based violence

<table>

Integrated service delivery

Health facilities delivering HIV counselling and testing with SRH services\textsuperscript{57}

All

Health facilities delivering HIV treatment and care with SRH services\textsuperscript{58}

All
SERVICE DELIVERY: REPRODUCTIVE HEALTH

Women have the right to decide whether, when and how many children they want to have, and to do so safely, without fear of acquiring STIs including HIV, or of maternal morbidity and mortality. Women require access to a choice of modern contraceptive methods and quality antenatal, childbirth and postnatal care, safe abortion care (to the full extent of the law), post abortion care and infertility services.

ND = No Data

Global Targets: Achieved — Challenged remain — Major challenges remain

### Contraception / Family Planning

- **Demand for family planning satisfied with a modern method of contraception (15-49)**
  - ND
  - 49.9%

- **Unmet need for family planning (15-49)**
  - ND

- **Knowledge of modern contraceptive methods**
  - Injection: 21.8%
  - Self injectable: ND
  - Pill: 7.1%
  - Male condom: 2.0%
  - IUD: 5.2%
  - Implant: 25.8%
  - Female sterilization: 35.3%
  - Other modern methods: 2.8%

- **Use of modern contraceptive methods**
  - ND: 25.2%

### Antenatal, delivery and postnatal care

- **Attending antenatal clinic**
  - At least once: 99.0%
  - At least 4 times: 70.4%

- **Proportion of births attended by skilled health personnel**
  - 98.3%

- **Births by caesarean section**
  - 17.4%

- **Postnatal checkup in first two days after birth**
  - ND

### Vertical transmission of HIV

- **Pregnant women tested for HIV**
  - ND

- **Early infant diagnosis (HIV-testing of infants at risk)**
  - ND

- **Vertical transmission (at 12 months)**
  - ND

- **Primary infertility among women**
  - ND

### Vertical transmission of syphilis

- **Tested for syphilis at 1st antenatal care visit**
  - 95.7%

- **Percentage testing positive for syphilis who are treated**
  - 0%

- **Congenital syphilis rate**
  - 0.0

### Abortion

- **Abortions per 1,000 women (15-49)**
  - ND
### HIV prevention
- Condom use at last high risk sex (15-49)
- Male circumcision

### 95-95-95 testing and treatment cascade
- People living with HIV who know their status (15+)
- People living with HIV who are on ART (15+)
- People living with HIV on ART who achieve viral load suppression (15+)

### PrEP and HIV self-testing
- Current oral pre-exposure prophylaxis for HIV (PrEP) users
- HIV self tests conducted

### Syphilis
- Active syphilis among men who have sex with men
- Active syphilis among sex workers

### Gender based violence
- Women experiencing physical or sexual violence in past 12 months (15-49)
- Wife agrees husband justified beating her - at least one reason specified

### Cervical cancer
- Existence of national HPV vaccination programme
- Existence of national cervical cancer screening programme

### Global Targets:
- Achieved
- Challenges remain
- Major challenges remain

**ND** = No Data
Harmful practices

- Girls married before 18
  - 10.1%
- Female genital mutilation / cutting
  - ND

Comprehensive Sexuality Education

- Primary schools fully implementing national CSE policy
  - ND
- Secondary schools fully implementing national CSE policy
  - ND

Adolescent sexual health

- Had multiple partners and used a condom at last sex (15-19)
  - Female: ND
  - Male: ND
- Correct knowledge of HIV prevention (15-24)
  - Female: 12.1%
  - Male: 14.0%

1. The cutoff for data included in this Infographic Snapshot is 15/04/2021. The year provided for each endnote is the date of the latest available data with an earliest date of 2011. Where data is not available in an international data source ‘No data’ is stated. This does not mean that no data exists for this indicator but that no data was found in internationally validated data sources.

11. 2017. Indicator: SDG3.2.1. The estimated number of women, between the age of 15-49, who die from pregnancy-related causes while pregnant or within 42 days of termination of pregnancy, per 100,000 live births. Source: SDG database - https://unstats.un.org/sdgs-indicators/database

36. No Data. Indicator: SDG 5.6.2. Extent to which countries have laws and regulations that guarantee full and equal access to women and men aged 15 years and older to SRH care, information and education. Source: SDG database - https://unstats.un.org/sdgs/indicators/database

40. No Data. Indicator: Indicator: Percentage of married women who say that they have the final say in own health care. Source: DHS - https://www.statcompiler.com/
