This country snapshot provides an overview of national data relating to sexual and reproductive health and rights (SRHR) throughout the life course. Realization of SRHR\(^2\) requires provision of comprehensive, people-centred services, that address the different elements of SRHR, and which are supported by an enabling environment, quality health systems, and meaningful community engagement. Multiple, synergistic cross-linkages exist within and between the different SRHR elements, leading to sequential outcome benefits throughout the life course.\(^3\)

By highlighting the national SRHR situation - including successes, areas for improvement, and data gaps - this snapshot can be used for determining priorities, planning of programmes, resource mobilization, and strengthening of health systems, service delivery and community engagement.

This snapshot uses the latest data publicly available at the publication date\(^1\), from reputable international sources (see endnotes for the year and source of each data point). It is acknowledged that intersectionality and people-centredness are not well reflected in available data, and that many categories of information currently collected are gender-binary.
The Sustainable Development Goals (SDGs) and Universal Health Coverage (UHC) agendas provide important opportunities to realise sexual and reproductive health and rights for all, including key and vulnerable populations, and to reimagine and enhance equitable access and quality coverage of SRH services. Delivery of comprehensive SRHR interventions throughout the life course is an essential component of UHC.

### Demographic data

**Population size**: 1.4m
- Female: 0.71m
- Male: 0.69m

**Life expectancy at birth**
- Female: 79.9
- Male: 72.5

**Population age distribution**

<table>

### Sexual and Reproductive Health

**Total fertility rate**: 1.7 births per woman

**Adolescent birth rate**: 30.1 per 1,000 women aged 15-19

**Median age at first sex among young people (20-24)**

- Male: ND
- Female: ND

**Young women (20-24) married before age 18**: 11.2%

**Maternal mortality ratio**: 67 per 100,000 live births

**Maternal mortality due to HIV**: ND

**Neonatal mortality rate**: 11.5 per 1000 live births

### HIV

**Number of new HIV infections**:<br>
- Child (0-14): ND<br>
- Female (15-24): <100<br>
- Male (15-24): <100<br>
- Female (25-49): <100<br>
- Male (25-49): <100<br>
- Female (50+): <100<br>
- Male (50+): <100<br>
- Total: <200

**Number of people living with HIV**:<br>
- ND<br>
- <200<br>
- <100<br>
- 2,900<br>
- 2,300<br>
- 2,300<br>
- 2,700<br>
- 11,000<br>
- <200

**Number of AIDS related deaths**:<br>
- ND<br>
- <100<br>
- <100<br>
- <100<br>
- <100<br>
- <100<br>
- <100<br>
- <200

**HIV incidence per 1,000 population (15+)**: 0.09

**HIV prevalence among adults (15-49)**: 0.7%
ENABLING ENVIRONMENT

Supportive laws and policies, and access to justice are essential to eliminate stigma, discrimination, violence, coercion and exclusion in health care. Such laws and policies create a safe and supportive enabling environment that meets the SRHR needs of all people, especially key and vulnerable populations. Harmful laws need to be amended, and damaging practices need to be countered at all levels.

ND = No Data

Global Targets: Achieved ○ Challenges remain ○ Major challenges remain ○

Laws and policies

People living with HIV
Are there laws or policies that:
- Criminalize transmission, exposure or non-disclosure of HIV
  - ND
- Restrict entry, stay and residence of people living with HIV
  - ND
- Protect against discrimination on basis of HIV status
  - ND
- Allow HIV self-testing
  - No
- Make oral pre-exposure prophylaxis for HIV (PrEP) available
  - ND

Key populations
Are there laws or policies that:
- Criminalize same-sex sexual behaviour
  - No
- Criminalize sex work
  - Yes
- Allow the death penalty for people convicted of drug-related offences
  - ND
- Support a harm reduction approach for people who use drugs
  - ND
- Legally recognize a third gender
  - ND

SRHR and gender-based violence
Are there laws or policies that:
- Allow safe abortion
  - Yes
  - To save a woman’s life
  - Yes
  - To preserve a woman’s physical health
  - Yes
  - To preserve a woman’s mental health
  - ND
  - In case of rape
  - ND
  - In case of incest
  - ND
  - Owing to foetal impairment
  - ND
  - For economic or social reasons
  - ND
  - On request
  - ND
- Require spousal consent for married women to access SRH services
  - ND
- Explicitly criminalize marital rape
  - Yes
- Criminalize domestic violence
  - Yes
- Criminalize sexual harassment
  - No
- Require provision of CSE in primary school
  - ND
- National strategy or policy on self-care interventions
  - ND

Extent to which laws and regulations guarantee access to SRH care and education (SDG 5.6.2)

Percentage of women (15-49) making SRHR decisions

ND

Global Gender Gap Index

Ranking (out of 156 countries) Score (1.0 = parity)

Score 0.7
Ranking 37

Stigma

Percentage of general population reporting discriminatory attitudes towards people living with HIV

ND
Universal health coverage (UHC) is central to achieving better health and well-being for all people throughout the life course. Reaching UHC requires transforming health systems away from vertical and top-down approaches towards integrated, people-centred, supportive systems for health. Comprehensive SRHR, within UHC, is crucial to support progress towards advancing health and wellbeing for all.

**Global Targets:** Achieved 🟢 Challenges remain 🟠 Major challenges remain 🟥

### Universal Health Coverage

- Coverage of essential health services (SDG 3.8.1)⁴⁴

### Governance

- Legislation on universal health coverage⁴⁷
  - No

### Health Workforce

- Skilled health professionals (per 10,000 population)
  - Doctors⁴⁸a: 44.8
  - Nurses and Midwives⁴⁸b: 40.7
  - Pharmacists⁴⁸c: 6.64

### Supply Chain

- Availability of essential medicines and commodities in Public Health facilities⁴⁹
  - ND

- Male condom stock-out in the past 12 months⁵⁰
  - ND

### Health Information

- Paper-based or electronic health information system⁵¹
  - Both

- Antenatal care data captured in health information system⁵²
  - ND

### Health Financing

- Total health expenditure as a percentage of GDP⁵³
  - 6.9%

- Government health expenditure as percentage of GDP⁵⁴
  - 3.4%

- Total health expenditure per capita (USD)⁵⁵
  - $1123.4

- Government expenditure on reproductive health per capita (USD)⁵⁶
  - ND

### Integrated Service Delivery

- Health facilities delivering HIV counselling and testing with SRH services⁵⁷
  - Data Not Available

- Health facilities delivering HIV treatment and care with SRH services⁵⁸
  - Data Not Available
Women have the right to decide whether, when and how many children they want to have, and to do so safely, without fear of acquiring STIs including HIV, or of maternal morbidity and mortality. Women require access to a choice of modern contraceptive methods and quality antenatal, childbirth and postnatal care, safe abortion care (to the full extent of the law), post abortion care and infertility services.

**Contraception / Family Planning**

- **Demand for family planning satisfied with a modern method of contraception (15-49)**
  - 58.2%

- **Knowledge of modern contraceptive methods**
  - Injection: 7.2%
  - Self injectable: ND
  - Pill: 29.3%
  - Male condom: 35.1%
  - IUD: 4.5%
  - Implant: 1.1%
  - Female sterilization: 21.0%
  - Other modern methods: 1.9%

- **Unmet need for family planning (15-49)**
  - 24.3%

- **Use of modern contraceptive methods (women 15-49)**
  - 37.6%

**Antenatal, delivery and postnatal care**

- **Attending antenatal clinic**
  - At least once: 95.1%
  - At least 4 times: 100.0%

- **Proportion of births attended by skilled health personnel**
  - 100.0%

- **Births by caesarean section**
  - 22.1%

- **Postnatal checkup in first two days after birth**
  - 92.0%

**Vertical transmission of HIV**

- **Pregnant women tested for HIV**
  - 73.0%

- **Early infant diagnosis (HIV-testing of infants at risk)**
  - ND

- **Vertical transmission (at 12 months)**
  - ND

- **Primary infertility among women**
  - ND

**Vertical transmission of syphilis**

- **Tested for syphilis at 1st antenatal care visit**
  - 95.9%

- **Percentage testing positive for syphilis who are treated**
  - 50.0%

- **Congenital syphilis rate (per 100,000 live births)**
  - ND

**Abortion**

- **Abortions per 1,000 women (15-49)**
  - ND

**Global Targets:**

- Achieved
- Challenges remain
- Major challenges remain

**ND = No Data**

**SERVICE DELIVERY: SEXUAL HEALTH**

Sexual health is a state of physical, emotional, mental and social well-being in relation to sexuality. It requires a positive and respectful approach to sexuality and sexual relationships, as well as the possibility of having pleasurable and safe sexual experiences, free of coercion, stigma, discrimination and violence.
### SERVICE DELIVERY: SEXUAL AND REPRODUCTIVE HEALTH FOR ALL

Everyone has the right to access sexual and reproductive health services and information, free of force or coercion, and irrespective of age, sex, sexual orientation, gender identity, ability, socio-economic or occupational status.
