This country snapshot provides an overview of national data relating to sexual and reproductive health and rights (SRHR) throughout the life course. Realization of SRHR requires provision of comprehensive, people-centred services, that address the different elements of SRHR, and which are supported by an enabling environment, quality health systems, and meaningful community engagement. Multiple, synergistic cross-linkages exist within and between the different SRHR elements, leading to sequential outcome benefits throughout the life course.

By highlighting the national SRHR situation - including successes, areas for improvement, and data gaps - this snapshot can be used for determining priorities, planning of programmes, resource mobilization, and strengthening of health systems, service delivery and community engagement.

This snapshot uses the latest data publically available at the publication date, from reputable international sources (see endnotes for the year and source of each data point). It is acknowledged that intersectionality and people-centredness are not well reflected in available data, and that many categories of information currently collected are gender-binary.
The Sustainable Development Goals (SDGs) and Universal Health Coverage (UHC) agendas provide important opportunities to realise sexual and reproductive health and rights for all, including key and vulnerable populations, and to reimagine and enhance equitable access and quality coverage of SRH services. Delivery of comprehensive SRHR interventions throughout the life course is an essential component of UHC.

ND = No Data

**Demographic data**

- **Population size**: 97.3m
- **Female**: 48.7m
- **Male**: 48.6m

**Life expectancy at birth**

- **Female**: 78.1
- **Male**: 69.6

**Population age distribution**

**HIV incidence per 1,000 population (15+)**: 0.07

**HIV prevalence among adults (15-49)**: 0.3%
Supportive laws and policies, and access to justice are essential to eliminate stigma, discrimination, violence, coercion and exclusion in health care. Such laws and policies create a safe and supportive enabling environment that meets the SRHR needs of all people, especially key and vulnerable populations. Harmful laws need to be amended, and damaging practices need to be countered at all levels.

### Laws and policies

#### People living with HIV

Are there laws or policies that:

- Criminalize transmission, exposure or non-disclosure of HIV\(^\text{19}\) **Yes**
- Restrict entry, stay and residence of people living with HIV\(^\text{20}\) **ND**
- Protect against discrimination on basis of HIV status\(^\text{21}\) **Yes**
- Allow HIV self-testing\(^\text{22}\) **Yes**
- Make oral pre-exposure prophylaxis for HIV (PrEP) available\(^\text{23}\) **ND**

#### SRHR and gender-based violence

Are there laws or policies that:

- Allow safe abortion\(^\text{29}\)
  - To save a woman’s life **ND**
  - To preserve a woman’s physical health **ND**
  - To preserve a woman’s mental health **ND**
  - In case of rape **ND**
  - In case of incest **ND**
  - Owing to foetal impairment **ND**
  - For economic or social reasons **ND**
  - On request **Yes**
- Require spousal consent for married women to access SRH services\(^\text{30}\) **No**
- Explicitly criminalize marital rape\(^\text{31}\) **Yes**
- Criminalize domestic violence\(^\text{32}\) **Yes**
- Criminalize sexual harassment\(^\text{33}\) **Yes**
- Require provision of CSE in primary school\(^\text{34}\) **Yes**
- National strategy or policy on self-care interventions\(^\text{35}\) **ND**

### Key populations

Are there laws or policies that:

- Criminalize same-sex sexual behaviour\(^\text{34}\) **No**
- Criminalize sex work\(^\text{35}\) **Yes**
- Allow the death penalty for people convicted of drug-related offences\(^\text{26}\) **Yes**
- Support a harm reduction approach for people who use drugs\(^\text{31}\) **Yes**
- Legally recognize a third gender\(^\text{38}\) **ND**

### Extent to which laws and regulations guarantee access to SRH care and education (SDG 5.6.2)\(^\text{40}\)

<table>
<thead>
<tr>
<th>Maternity care</th>

### Stigma

- Percentage of general population reporting discriminatory attitudes towards people living with HIV\(^\text{43}\)

**ND**

ND = No Data
Universal health coverage (UHC) is central to achieving better health and well-being for all people throughout the life course. Reaching UHC requires transforming health systems away from vertical and top-down approaches towards integrated, people-centred, supportive systems for health. Comprehensive SRHR, within UHC, is crucial to support progress towards advancing health and wellbeing for all.

**Global Targets:**
- **Achieved**
- **Challenges remain**
- **Major challenges remain**

### Universal Health Coverage

**Coverage of essential health services (SDG 3.8.1)**
- **Progress**
  - **75**

**Catastrophic health spending (SDG 3.8.2)**
- Households where expenditure on health is greater than:
  - **10% of income**: **9.4%**
  - **25% of income**: **1.9%**

### Governance

- **Legislation on universal health coverage**
  - **No**

### Health workforce

- **Skilled health professionals (per 10,000 population)**
  - **Doctors**
    - **8.3**
  - **Nurses and Midwives**
    - **14.5**
  - **Pharmacists**
    - **3.39**

### Supply Chain

- **Availability of essential medicines and commodities in Public Health facilities**
  - **ND**
- **Male condom stock-out in the past 12 months**
  - **No**

### Health information

- **Paper-based or electronic health information system**
  - **Both**
- **Antenatal care data captured in health information system**
  - **ND**

### Health financing

- **Total health expenditure as a percentage of GDP**
  - **5.9%**
- **Government health expenditure as percentage of GDP**
  - **2.7%**
- **Total health expenditure per capita (USD)**
  - **$151.7**
- **Government expenditure on reproductive health per capita (USD)**
  - **ND**

### Integrated service delivery

- **Health facilities delivering HIV counselling and testing with SRH services**
  - **All**
  - **Some**
  - **None**
- **Health facilities delivering HIV treatment and care with SRH services**
  - **All**
  - **Some**
  - **None**
**Contraception / Family Planning**

- **Demand for family planning** satisfied with a modern method of contraception (15-49)\(^5\)
  - 69.6%

- **Knowledge of modern contraceptive methods**\(^10\)
  - Injection: 1.8%
  - Self injectable: ND
  - Pill: 23.5%
  - Male condom: 19.5%
  - IUD: 52.9%
  - Implant: 0.5%
  - Female sterilization: 1.7%
  - Other modern methods: 0.2%

- **Unmet need for family planning** (15-49)\(^2\)
  - ND

- **Use of modern contraceptive methods** (women 15-49)\(^3\)
  - 66.5%

**Antenatal, delivery and postnatal care**

- **Attending antenatal clinic**
  - At least once\(^4\):
    - 95.8%
  - At least 4 times\(^5\):
    - 73.7%

- **Proportion of births attended by skilled health personnel**\(^8\)
  - 93.8%

- **Births by caesarean section**\(^5\)
  - 27.5%

- **Postnatal checkup in first two days after birth**\(^4\)
  - 89.8%

**Vertical transmission of HIV**

- **Pregnant women tested for HIV**\(^9\)
  - 90.1%

- **Early infant diagnosis** (HIV-testing of infants at risk)\(^9\)
  - 46.4%

- **Vertical transmission (at 12 months)**\(^1\)
  - 12.2%

- **Primary infertility among women**\(^7\)
  - ND

**Vertical transmission of syphilis**

- **Tested for syphilis at 1st antenatal care visit**\(^7\)
  - ND

- **Percentage testing positive for syphilis who are treated**\(^7\)
  - ND

- **Congenital syphilis rate** (per 100,000 live births)\(^7\)
  - ND

**Abortion**

- **Abortions per 1,000 women** (15-49)\(^7\)
  - ND

---

**SERVICE DELIVERY: REPRODUCTIVE HEALTH**

Women have the right to decide whether, when and how many children they want to have, and to do so safely, without fear of acquiring STIs including HIV, or of maternal morbidity and mortality. Women require access to a choice of modern contraceptive methods and quality antenatal, childbirth and postnatal care, safe abortion care (to the full extent of the law), post abortion care and infertility services.

ND = No Data

**Global Targets:**
- Achieved
- Challenges remain
- Major challenges remain
### HIV prevention

- **Condom use at last high-risk sex (15-49)**: 77%
  - Male: ND
  - Female: ND

- **Male circumcision**: ND

- **People living with HIV who know their status (15+)**: 78%
  - Female: ND
  - Male: ND

- **People living with HIV who know their status who are on ART (15+)**: 79%
  - Female: 77%
  - Male: 66%

- **People living with HIV on ART who achieve viral load suppression (15+)**: 80%
  - Female: 74%
  - Male: 62%

### PrEP and HIV self-testing

- **Current oral pre-exposure prophylaxis for HIV (PrEP) users**: 7,564
- **HIV self tests conducted**: ND

### Syphilis

- **Active syphilis among men who have sex with men**: 6.7%
- **Active syphilis among sex workers**: 2.1%

### Gender based violence

- **Women experiencing physical or sexual violence in past 12 months (15-49)**: ND
  - Wife agrees husband justified beating her - at least one reason specified: 28.2%

### Care/support provided by service delivery points in cases of rape or incest

- First-line support (psychological first aid): Yes
- Emergency contraception for women (within 5 days): Yes
- Safe abortion (in accordance with national laws): Yes
- Post-exposure prophylaxis for STIs and HIV (within 72 hours): No

### Cervical cancer

- **Existence of national HPV vaccination programme**: No
- **Existence of national cervical cancer screening programme**: Yes
- **Type of programme**: Organized population based screening
- **Coverage of national screening programme**: 10-50%
### Harmful practices

The cutoff for data included in this Infographic Snapshot is 15/04/2021. The year provided for each endnote is the date of the latest available data with an earliest date of 2011. Where data is not available in an international data source ‘No data’ is stated. This does not mean that no data exists for this indicator but that no data was found in internationally validated data sources.

11. 2017. Indicator: SDG3.1.1. The estimated number of women, between the age of 15-49, who die from pregnancy-related causes while pregnant or within 42 days of termination of pregnancy, per 100,000 live births. Source: SDG database - https://unstats.un.org/unsd/gender/Data/QualitativeIndicators.html

36. 2019. Indicator: SDG 5.6.2. Extent to which countries have laws and regulations that guarantee full and equal access to women and men aged 15 years and older to SRH care, information and education. Source: SDG database - https://unstats.un.org/sdgs/indicators/database

38. No Data. Indicator: Legal minimum age for marriage without parental consent (where an age range given, the lowest figure was used). Source: United Nations Statistics Division - http://unstats.un.org/unsd/gender/Data/Qualitative%20Indicators.html

No Data. Indicator: Percentage of women and men 15–49 years old who report discriminatory attitudes towards people living with HIV. Source: UNAIDS - https://aidsinfo.unaids.org

2014. Indicator: Percentage of women ages 15-49 who believe a husband/partner is justified in hitting or beating his wife/partner for any of the following five reasons: argues with him; refuses to have sex; burns the food; goes out without telling him; or when she neglects the children. Source: Demographic and Health Surveys (DHS) and Multiple Indicator Cluster Surveys (MICS) - http://data.worldbank.org/indicator/SG.VAM.REAS.ZS

2018. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: first-line support (psychological first aid) - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

2014. Indicator: Percentage of women aged 15 to 49 with a live birth in a given time period that received antenatal care provided by skilled health personnel (doctor, nurse or midwife) at least once during pregnancy Source: UNICEF antenatal care coverage database - http://data.unicef.org/maternal-health/antenatal-care.html

2014. Indicator: Percentage of women aged 15 to 49 with a live birth in a given time period that received antenatal care four or more times Source: UNICEF. Antenatal care coverage database - http://data.unicef.org/maternal-health/antenatal-care.html

2014. Indicator: Percentage of women aged 15 to 49 who experienced physical or sexual violence from a husband/partner over the past 12 months that is satisfied with modern methods (modern contraceptive prevalence divided by total demand for family planning). Source: SDG database - https://unstats.un.org/sdgs/indicators/database

No Data. Indicator: Percentage of women and men 15–49 years old who report discriminatory attitudes towards people living with HIV. Source: UNAIDS - https://aidsinfo.unaids.org
