This country snapshot provides an overview of national data relating to sexual and reproductive health and rights (SRHR) throughout the life course. Realization of SRHR requires provision of comprehensive, people-centred services, that address the different elements of SRHR, and which are supported by an enabling environment, quality health systems, and meaningful community engagement. Multiple, synergistic cross-linkages exist within and between the different SRHR elements, leading to sequential outcome benefits throughout the life course.

By highlighting the national SRHR situation - including successes, areas for improvement, and data gaps - this snapshot can be used for determining priorities, planning of programmes, resource mobilization, and strengthening of health systems, service delivery and community engagement.

This snapshot uses the latest data publically available at the publication date, from reputable international sources (see endnotes for the year and source of each data point). It is acknowledged that intersectionality and people-centredness are not well reflected in available data, and that many categories of information currently collected are gender-binary.
**Demographic data**

**Population size** 14.9m

Female 7.8m

Male 7.1m

**Life expectancy at birth**

Female 63.6

Male 57.5

**Population age distribution**

4.31

**HIV prevalence among adults (15-49)**

12.8%

**CONTEXT**

The Sustainable Development Goals (SDGs) and Universal Health Coverage (UHC) agendas provide important opportunities to realise sexual and reproductive health and rights for all, including key and vulnerable populations, and to reimagine and enhance equitable access and quality coverage of SRH services. Delivery of comprehensive SRHR interventions throughout the life course is an essential component of UHC.

ND = No Data

**Global Targets:**

- Achieved
- Challenges remain
- Major challenges remain
### Impact on integrated SRHR: Supportive  Partial  Punitive

#### Laws and policies

**People living with HIV**

- Are there laws or policies that:
  - Criminalize transmission, exposure or non-disclosure of HIV³³: Yes
  - Restrict entry, stay and residence of people living with HIV⁰⁰: No
  - Protect against discrimination on basis of HIV status²¹: No
  - Allow HIV self-testing²²: Yes
  - Make oral pre-exposure prophylaxis for HIV (PrEP) available³⁷: Yes

**Key populations**

- Are there laws or policies that:
  - Criminalize same-sex sexual behaviour²⁴: Yes
  - Criminalize sex work²⁵: Yes
  - Allow the death penalty for people convicted of drug-related offences²⁶: No
  - Support a harm reduction approach for people who use drugs²⁷: No
  - Legally recognize a third gender²⁸: ND

#### SRHR and gender-based violence

**Are there laws or policies that:**

- Allow safe abortion²⁹:
  - To save a woman’s life: Yes
  - To preserve a woman’s physical health: Yes
  - To preserve a woman’s mental health: No
  - In case of rape: Yes
  - In case of incest: Yes
  - Owing to foetal impairment: Yes
  - For economic or social reasons: No
  - On request: No
- Require spousal consent for married women to access SRH services³⁰: No
- Explicitly criminalize marital rape³¹: No
- Criminalize domestic violence³²: Yes
- Criminalize sexual harassment³³: Yes
- Require provision of CSE in primary school³⁴: Yes
- National strategy or policy on self-care interventions³⁵: ND

#### Extent to which laws and regulations guarantee access to SRH care and education (SDG 5.6.2)³⁴

<table>

#### Age of Consent

**Legal age for consent to sexual intercourse³⁷**

- Female: ND
- Male: ND

**Legal age for marriage without parental consent³⁸**

- Female: 18 yrs
- Male: 18 yrs

**Laws requiring parental consent for adolescents to access SRH services³⁹**

- Yes <16yrs

#### Women’s empowerment

- Percentage of women that believe they should have final making SRHR decisions⁴¹:
  - 90.7%
- Percentage of women (15-49) say in decisions regarding their own healthcare⁴⁰:
  - 59.9%

**Global Gender Gap Index⁴²**

- Score (1.0 = parity): 0.7
- Ranking: 47

**Stigma**

- Percentage of general population reporting discriminatory attitudes towards people living with HIV⁴³:
  - 26.0%

---

**ENABLING ENVIRONMENT**

Supportive laws and policies, and access to justice are essential to eliminate stigma, discrimination, violence, coercion and exclusion in health care. Such laws and policies create a safe and supportive enabling environment that meets the SRHR needs of all people, especially key and vulnerable populations. Harmful laws need to be amended, and damaging practices need to be countered at all levels.

ND = No Data

Global Targets: Achieved  Challenges remain  Major challenges remain
Universal health coverage (UHC) is central to achieving better health and well-being for all people throughout the life course. Reaching UHC requires transforming health systems away from vertical and top-down approaches towards integrated, people-centred, supportive systems for health. Comprehensive SRHR, within UHC, is crucial to support progress towards advancing health and wellbeing for all.

Global Targets:
- Achieved
- Challenges remain
- Major challenges remain

**Universal Health Coverage**

- **Coverage of essential health services (SDG 3.8.1)**
  - 54

- **Catastrophic health spending (SDG 3.8.2)**
  - Households where expenditure on health is greater than:
    - 10% of income
    - 25% of income

**Governance**

- **Legislation on universal health coverage**
  - No

**Health workforce**

- **Skilled health professionals (per 10,000 population)**
  - Doctors
    - 2.1
  - Nurses and Midwives
    - 19.3
  - Pharmacists
    - 0.97

**Supply Chain**

- **Availability of essential medicines and commodities in Public Health facilities**
  - ND

**Health information**

- **Male condom stock-out in the past 12 months**
  - Yes

- **Paper-based or electronic health information system**
  - Both

- **Antenatal care data captured in health information system**
  - Yes

**Health financing**

- **Total health expenditure as a percentage of GDP**
  - 4.7%

- **Government health expenditure as percentage of GDP**
  - 1.3%

- **Total health expenditure per capita (USD)**
  - 140.3

- **Government expenditure on reproductive health per capita (USD)**
  - ND

**Integrated service delivery**

- **Health facilities delivering HIV counselling and testing with SRH services**
  - All

- **Health facilities delivering HIV treatment and care with SRH services**
  - All
### Contraception / Family Planning

- **Demand for family planning satisfied with a modern method of contraception (15-49)**
  - 84.8%

- **Knowledge of modern contraceptive methods**
  - Injection: 14.6%
  - Self injectable: ND
  - Pill: 62.3%
  - Male condom: 5.8%
  - IUD: 0.9%
  - Implant: 14.6%
  - Female sterilization: 1.2%
  - Other modern methods: 0.6%

- **Unmet need for family planning (15-49)**
  - 10.4%

- **Use of modern contraceptive methods (women 15-49)**
  - 65.8%

### Antenatal, delivery and postnatal care

- **Attending antenatal clinic**
  - At least once: 93.3%
  - At least 4 times: 71.5%

- **Proportion of births attended by skilled health personnel**
  - 86.0%

- **Births by caesarean section**
  - 8.8%

- **Postnatal checkup in first two days after birth**
  - 56.6%

### Vertical transmission of HIV

- **Pregnant women tested for HIV**
  - 83.6%

- **Early infant diagnosis (HIV-testing of infants at risk)**
  - 55.7%

- **Vertical transmission (at 12 months)**
  - 8.2%

- **Primary infertility among women**
  - ND

### Vertical transmission of syphilis

- **Tested for syphilis at 1st antenatal care visit**
  - 90.6%

- **Percentage testing positive for syphilis who are treated**
  - 80.4%

- **Congenital syphilis rate**
  - ND

### Abortion

- **Abortions per 1,000 women (15-49)**
  - ND

---

**SERVICE DELIVERY: REPRODUCTIVE HEALTH**

Women have the right to decide whether, when and how many children they want to have, and to do so safely, without fear of acquiring STIs including HIV, or of maternal morbidity and mortality. Women require access to a choice of modern contraceptive methods and quality antenatal, childbirth and postnatal care, safe abortion care (to the full extent of the law), post abortion care and infertility services.

ND = No Data

**Global Targets:**
- **Achieved**
- **Challenges remain**
- **Major challenges remain**

**Notes:**
- Contraception / Family Planning
- Antenatal, delivery and postnatal care
- Vertical transmission of HIV
- Vertical transmission of syphilis
- Abortion

**Service Delivery**

- Women have the right to decide whether, when and how many children they want to have, and to do so safely, without fear of acquiring STIs including HIV, or of maternal morbidity and mortality. Women require access to a choice of modern contraceptive methods and quality antenatal, childbirth and postnatal care, safe abortion care (to the full extent of the law), post abortion care and infertility services.

- **Challenges remain**
- **Major challenges remain**

Everyone has the right to access sexual and reproductive health services and information, free of force or coercion, and irrespective of age, sex, sexual orientation, gender identity, ability, socio-economic or occupational status.
1. The cutoff for data included in this Infographic Snapshot is 15/04/2021. The year provided for each endnote is the date of the latest available data with an earliest date of 2011. Where data is not available in an international data source ‘No data’ is stated. This does not mean that no data exists for this indicator but that no data was found in internationally validated data sources.

11. 2017. Indicator: SDG3.1.1. The estimated number of women, between the age of 15-49, who die from pregnancy-related causes while pregnant or within 42 days of termination of pregnancy, per 100,000 live births. Source: SDG database - https://unstats.un.org/sdgs/indicators/dataset/

33. No Data. Indicator: SDG 5.6.2. Extent to which countries have laws and regulations that guarantee full and equal access to women and men aged 15 years and older to SRH care, information and education. Source: SDG database - https://unstats.un.org/sdgs/indicators/dataset

35. 2013. Indicator: Legal minimum age for marriage without parental consent (where an age range given, the lowest figure was used). Source: United Nations Statistics Division - http://unstats.un.org/unsd/gender/Data/Qualitative%20Indicators.html

47. 2017. Indicator: Countries that have passed legislation on universal health coverage. Source: WHO Global Health Observatory - http://apps.who.int/gho/ua/uhc-hs-cabinet-wrapper-v2.jsp?id=1030103
59. 2015. Indicator: SDG 3.7.1. Percentage of total demand for family planning among married or in-union women aged 15 to 49 that is satisfied with modern methods (modern contraceptive prevalence divided by total demand for family planning). Source: SDG database - https://uns.un.org/sdg/indicators/database
64. 2019. Indicator: Percentage of women aged 15 to 49 with a live birth in a given time period that received antenatal care provided by skilled health personnel (doctor, nurse or midwife) at least once during pregnancy Source: UNICEF antenatal care coverage database - http://data.unicef.org/maternal-health/antenatal-care.html
65. 2019. Indicator: Percentage of women aged 15 to 49 with a live birth in a given time period that received antenatal care four or more times Source: UNICEF. Antenatal care coverage database - http://data.unicef.org/maternal-health/antenatal-care.html
73. 2019. Indicator: percentage of women accessing ante natal care services who were tested for syphilis at first ante natal care visit. Source: WHO Global Health Observatory data repository - http://apps.who.int/gho/data/view.main.Z3610
75. No Data. Indicator: Congenital syphilis rate per 100,000 live births. Source: WHO Global Health Observatory data repository - http://apps.who.int/gho/data/view.main.CONGENITALSYSTFI
86. 2015. Indicator: SDG 5.2.1. Proportion of ever-married or partnered women aged 15-49 who experienced physical or sexual violence from a current or former intimate partner in the past 12 months. Source: SDG database - https://uns.un.org/sdg/indicators/database
87. 2015. Indicator: Percentage of women aged 15-49 who believe a husband/partner is justified in hitting or beating his wife/partner for any of the following five reasons: argues with him; refuses to have sex; burns the food; goes out without telling him; or when she neglects the children. Source: Demographic and Health Surveys (DHS) and Multiple Indicator Cluster Surveys (MICS) - http://data.worldbank.org/indicator/SG.VAW.REAS.ZS
88. 2019. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest (psychological first aid) - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org
89. 2019. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Emergency contraception for women who seek services within five days - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

90. 2019. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Safe abortion if a woman becomes pregnant as a result of rape in accordance with national law (according to national authorities). Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

91. 2019. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Post-exposure prophylaxis for sexually transmitted infections and HIV (within 72 hours of sexual assault) - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

100. 2015. Indicator: Percentage of adolescents (aged 15–19) who reported having sexual intercourse with more than one partner in the last 12 months and who reported the use of a condom during their last sexual intercourse. Source: Demographic and Health Survey 2015. Compiled by UNICEF - https://data.unicef.org/topic/hivaidson/adolescents-young-people/

102. It is recognised that there are also a number of vulnerable populations at greater risk of poor HIV or SRH outcomes such as migrants/refugees, indigenous populations, people with disabilities, people experiencing homelessness etc. These are not included in this snapshot due to a lack of data.

106. 2019. Indicator: Percentage of men reporting the use of a condom the last time they had anal sex with a male partner. Source: UNAIDS estimates - https://aidsinfo.unaids.org

112. No Data. Indicator: Percentage of people who inject drugs who are living with HIV. Source: UNAIDS estimates - https://aidsinfo.unaids.org

113. No Data. Indicator: Percentage of people who inject drugs who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org

114. No Data. Indicator: Percentage of people who inject drugs reporting the use of a condom the last time they had sexual intercourse. Source: UNAIDS estimates - https://aidsinfo.unaids.org

117. No Data. Indicator: Percentage of transgender people who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org

118. No Data. Indicator: Percentage of transgender people reporting the use of a condom the last time they had sexual intercourse. Source: UNAIDS estimates - https://aidsinfo.unaids.org

120. 2015. Indicator: Percentage of prisoners who are living with HIV. Source: UNAIDS estimates - https://aidsinfo.unaids.org

121. No Data. Indicator: Percentage of prisoners who received an HIV test in the past 12 months and know their results. Source: No known source

122. No Data. Indicator: Percentage of prisoners reporting the use of a condom the last time they had sexual intercourse. Source: No known source
