

FIGURES & FACTS ABOUT SUICIDE

This document presents data on suicide mortality, by country, sex and age, starting in 1950, for most countries, when they started to provide mortality data to WHO.

For each country, a brief comment on trends over time and related to sex and age was obtained from experts in suicidology around the world.

This document is part of WHO's activities for the prevention of suicide and other suicidal behaviours.

KEY WORDS: suicide / mortality /
epidemiology / gender / age.
