This country snapshot provides an overview of national data relating to sexual and reproductive health and rights (SRHR) throughout the life course. Realization of SRHR\(^2\) requires provision of comprehensive, people-centred services, that address the different elements of SRHR, and which are supported by an enabling environment, quality health systems, and meaningful community engagement. Multiple, synergistic cross-linkages exist within and between the different SRHR elements, leading to sequential outcome benefits throughout the life course.\(^3\)

By highlighting the national SRHR situation - including successes, areas for improvement, and data gaps - this snapshot can be used for determining priorities, planning of programmes, resource mobilization, and strengthening of health systems, service delivery and community engagement.

This snapshot uses the latest data publically available at the publication date, from reputable international sources (see endnotes for the year and source of each data point). It is acknowledged that intersectionality and people-centredness are not well reflected in available data, and that many categories of information currently collected are gender-binary.

*Reissued for technical reasons on 29 April 2022*
The Sustainable Development Goals (SDGs) and Universal Health Coverage (UHC) agendas provide important opportunities to realise sexual and reproductive health and rights for all, including key and vulnerable populations, and to reimagine and enhance equitable access and quality coverage of SRH services. Delivery of comprehensive SRHR interventions throughout the life course is an essential component of UHC.

Demographic data

- Population size: 38.9m
- Female: 19.0m
- Male: 20.0m
- Life expectancy at birth:
  - Female: 63.2
  - Male: 63.3

Population age distribution

- 0-14, Female: 41.8%
- 15-24, Female: 22.0%
- 25-49, Male: 27.2%
- 50+, Male: 8.9%

Sexual and Reproductive Health

- Total fertility rate: 4.6 births per woman
- Adolescent birth rate: 69.0 per 1,000 women aged 15-19
- Median age at first sex among young people (20-24):
  - Male: ND
  - Female: 19.9

Young women (20-24) married before age 18: 28.3%

- Maternal mortality ratio: 638 per 100,000 live births
- Maternal mortality due to HIV: ND
- Neonatal mortality rate: 35.9 per 1,000 live births

HIV

- Number of new HIV infections
  - Child (0-14): <200
  - Female (15-24): <200
  - Male (15-24): <500
  - Female (25-49): <500
  - Male (25-49): <1,000
  - Female (50+): <100
  - Male (50+): <100
  - Total: 1,500

- Number of people living with HIV
  - Child (0-14): <500
  - Female (15-24): <500
  - Male (15-24): <1,000
  - Female (25-49): 2,300
  - Male (25-49): 6,000
  - Female (50+): <500
  - Male (50+): <100
  - Total: 11,000

- Number of AIDS related deaths
  - Child (0-14): <100
  - Female (15-24): <100
  - Male (15-24): <100
  - Female (25-49): <500
  - Male (25-49): 6,600
  - Female (50+): <100
  - Male (50+): <100
  - Total: <500

HIV incidence per 1,000 population (15+): 0.07

HIV prevalence among adults (15-49): 0.1%
**Impact on integrated SRHR:** Supportive  Partial  Punitive

**Laws and policies**

### People living with HIV

<table>

### Age of Consent

- **Legal age for consent to sexual intercourse:**³⁷
  - Female: ND
  - Male: ND
- **Legal age for marriage without parental consent:**³⁸
  - Female: 16
  - Male: 18

### Laws requiring parental consent for adolescents to access SRH services:³⁹

- ND

### Women's empowerment

- **Percentage of women that believe they should have final making SRHR decisions:**²¹
  - 89.7%
- **Percentage of women (15-49) say in decisions regarding their own healthcare:**²²
  - ND

### Global Gender Gap Index:⁴²

- **Score:** 0.4
- **Ranking:** 156

### Stigma

- **Percentage of general population reporting discriminatory attitudes towards people living with HIV:**³³
  - ND

---

**ENABLING ENVIRONMENT**

Supportive laws and policies, and access to justice are essential to eliminate stigma, discrimination, violence, coercion and exclusion in health care. Such laws and policies create a safe and supportive enabling environment that meets the SRHR needs of all people, especially key and vulnerable populations. Harmful laws need to be amended, and damaging practices need to be countered at all levels.

Global Targets:

- Achieved
- Challenges remain
- Major challenges remain

Universal Health Coverage is central to achieving better health and well-being for all people throughout the life course. Reaching UHC requires transforming health systems away from vertical and top-down approaches towards integrated, people-centred, supportive systems for health. Comprehensive SRHR, within UHC, is crucial to support progress towards advancing health and well-being for all.
Contraception / Family Planning

Demand for family planning satisfied with a modern method of contraception (15-49)

Knowledge of modern contraceptive methods

Modern contraceptive method (women 15-49)

- Injection: 32.8%
- Self injectable: ND
- Pill: 37.9%
- Male condom: 20.3%
- IUD: 5.6%
- Implant: 0%
- Female sterilization: 1.1%
- Other modern methods: 2.3%

Unmet need for family planning (15-49)

Use of modern contraceptive methods (women 15-49)

Antenatal, delivery and postnatal care

- Attending antenatal clinic: At least once 65.2%, At least 4 times 20.9%
- Proportion of births attended by skilled health personnel: 58.8%
- Births by caesarean section: 6.6%
- Postnatal checkup in first two days after birth: 37.4%

Vertical transmission of HIV

- Pregnant women tested for HIV: ND
- Early infant diagnosis (HIV-testing of infants at risk): 4.3%
- Vertical transmission (at 12 months): 42.6%
- Primary infertility among women: ND

Vertical transmission of syphilis

- Tested for syphilis at 1st antenatal care visit: 14.3%
- Percentage testing positive for syphilis who are treated: 100.0%
- Congenital syphilis rate (per 100,000 live births): ND
- Abortions per 1,000 women (15-49): ND

Global Targets: Achieved ▶ Challenges remain ▼ Major challenges remain ▼

ND = No Data

SERVICE DELIVERY: REPRODUCTIVE HEALTH

Women have the right to decide whether, when and how many children they want to have, and to do so safely, without fear of acquiring STIs including HIV, or of maternal morbidity and mortality. Women require access to a choice of modern contraceptive methods and quality antenatal, childbirth and postnatal care, safe abortion care (to the full extent of the law), post abortion care and infertility services.

ND = No Data
**SERVICE DELIVERY: SEXUAL HEALTH**

Sexual health is a state of physical, emotional, mental and social well-being in relation to sexuality. It requires a positive and respectful approach to sexuality and sexual relationships, as well as the possibility of having pleasurable and safe sexual experiences, free of coercion, stigma, discrimination and violence.

**HIV prevention**
- Condom use at last high risk sex (15-49) 77%
  - ND
- Male circumcision 99.1%

**95-95-95 testing and treatment cascade**
- People living with HIV who know their status (15+)
  - Female 21%
  - Male 28%
- People living with HIV who are on ART (15+)
  - Female 10%
  - Male 9%
- People living with HIV on ART who achieve viral load suppression (15+)
  - Female ND
  - Male ND

**PrEP and HIV self-testing**
- Current oral pre-exposure prophylaxis for HIV (PrEP) users 82
  - ND

**Syphilis**
- HIV self tests conducted
  - 0
- Active syphilis among men who have sex with men
  - 0.8%
- Active syphilis among sex workers
  - 0.4%

**Gender based violence**
- Women experiencing physical or sexual violence in past 12 months (15-49) 46.1%
- Wife agrees husband justified beating her - at least one reason specified 80.2%

**Care/support provided by service delivery points in cases of rape or incest**
- First-line support (psychological first aid) Yes
- Emergency contraception for women (within 5 days) Yes
- Safe abortion (in accordance with national laws) No
- Post-exposure prophylaxis for STIs and HIV (within 72 hours) Yes

**Cervical cancer**
- Existence of national HPV vaccination programme No
- Existence of national cervical cancer screening programme No
- Type of programme None
- Coverage of national screening programme 0%

**ND = No Data**
Harmful practices

- Girls married before 18: 28.3%
- Female genital mutilation / cutting: ND

Comprehensive Sexuality Education

- Primary schools fully implementing national CSE policy: ND
- Secondary schools fully implementing national CSE policy: ND

Adolescent sexual health

- Had multiple partners and used a condom at last sex (15-19): ND
- Correct knowledge of HIV prevention (15-24):
  - Female: 1.0%
  - Male: 6.3%

1. The cutoff for data included in this Infographic Snapshot is 15/04/2021. The year provided for each endnote is the date of the latest available data with an earliest date of 2011. Where data is not available in an international data source ‘No data’ is stated. This does not mean that no data exists for this indicator but that no data was found in internationally validated data sources.

11. 2017. Indicator: SDG3.1.1. The estimated number of women, between the age of 15-49, who die from pregnancy-related causes while pregnant or within 42 days of termination of pregnancy, per 100,000 live births. Source: SDG database - https://unstats.un.org/unsd/gender/Data/QualitativeIndicators.html

36. 2019. Indicator: SDG 5.6.2. Extent to which countries have laws and regulations that guarantee full and equal access to women and men aged 15 years and older to SRH care, information and education. Source: SDG database - https://unstats.un.org/sdgs/indicators/database

38. 2013. Indicator: Legal minimum age for marriage without parental consent (where an age range given, the lowest figure was used). Source: United Nations Statistics Division - https://unstats.un.org/unsd/gender/Data/Qualitative%20Indicators.html

40. 2015. Indicator: Indicator: Percentage of married women who say that they have the final say in own health care. Source: DHS - http://www.statcompiler.com

42. No Data. Indicator: Percentage of women and men 15–49 years old who report discriminatory attitudes towards people living with HIV. Source: UNAIDS - https://aidsinfo.unaids.org

59. 2019. Indicator: Percentage of total demand for family planning among married or in-union women aged 15 to 49 that is satisfied with modern methods (modern contraceptive prevalence divided by total demand for family planning). Source: SDG database - https://unstats.un.org/sdgs/indicators/database

64. 2018. Indicator: Percentage of women aged 15 to 49 with a live birth in a given time period that received antenatal care provided by skilled health personnel (doctor, nurse or midwife) at least once during pregnancy. Source: UNICEF antenatal care coverage database - http://data.unicef.org/maternal-health/antenatal-care.html

65. 2018. Indicator: Percentage of women aged 15 to 49 with a live birth in a given time period that received antenatal care four or more times Source: UNICEF. Antenatal care coverage database - http://data.unicef.org/maternal-health/antenatal-care.html

72. No Data. Indicator: Percentage of antenatal care services who were tested for syphilis at first antenatal care visit. Source: WHO Global Health Observatory data repository - http://apps.who.int/gho/data/view.main.Z3610

73. 2017. Indicator: Percentage of women accessing antenatal care services who were tested for syphilis at any antenatal care visit. Source: WHO Global Health Observatory data repository - http://apps.who.int/gho/data/view.main.A1362STh

75. No Data. Indicator: Congenital syphilis rate per 100,000 live births. Source: WHO Global Health Observatory data repository - http://apps.who.int/gho/data/view.main.CONGENITALSYFSTh

86. 2015. Indicator: Percentage of women aged 15-49 who believe a husband/partner is justified in hitting or beating his wife/partner for any of the following five reasons: argues with him; refuses to have sex; burns the food; goes out without telling him; or when she neglects the children. Source: Demographic and Health Surveys (DHS) and Multiple Indicator Cluster Surveys (MICS) - http://data.worldbank.org/indicator/SG.VAW.REAS.ZS

87. 2015. Indicator: People living with HIV who have sex with men with active syphilis. Source: UNAIDS estimates - https://aidsinfo.unaids.org

88. 2019. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: first-line support (psychological first aid) - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/
ENDNOTES

89. 2019. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Emergency contraception for women who seek services within five days - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

90. 2019. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Safe abortion if a woman becomes pregnant as a result of rape in accordance with national law (according to national authorities). Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

91. 2019. Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Post-exposure prophylaxis for sexually transmitted infections and HIV (within 72 hours of sexual assault) - according to national authorities. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

98. No Data. Indicator: Percentage of primary schools that have fully implemented education policies on life skills-based HIV and sexuality education. Source: UNAIDS Laws and Policies Analytics - http://lawsandpolicies.unaids.org/

100. No Data. Indicator: Percentage of adolescents (aged 15–19) who reported having sexual intercourse with more than one partner in the last 12 months and who reported the use of a condom during their last sexual intercourse. Source: UNICEF global databases - https://data.unicef.org/topic/hivaids/adolescents-young-people/

102. It is recognised that there are also a number of vulnerable populations at greater risk of poor HIV or SRH outcomes such as migrants/ refugees, indigenous populations, people with disabilities, people experiencing homelessness etc. These are not included in this snapshot due to a lack of data.

105. No Data. Indicator: Percentage of men who have sex with men who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org

106. 2012. Indicator: Percentage of men reporting the use of a condom the last time they had anal sex with a male partner. Source: UNAIDS estimates - https://aidsinfo.unaids.org

113. No Data. Indicator: Percentage of people who inject drugs who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org

117. No Data. Indicator: Percentage of transgender people who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - https://aidsinfo.unaids.org

118. No Data. Indicator: Percentage of transgender people reporting the use of a condom the last time they had sexual intercourse. Source: UNAIDS estimates - https://aidsinfo.unaids.org

120. No Data. Indicator: Percentage of prisoners who are living with HIV. Source: UNAIDS estimates - https://aidsinfo.unaids.org

121. No Data. Indicator: Percentage of prisoner who received an HIV test in the past 12 months and know their results. Source: No known source

122. No Data. Indicator: Percentage of prisoners reporting the use of a condom the last time they had sexual intercourse. Source: No known source
