Since 24 February, continued deterioration and new parts of the country affected

- Ukraine’s Deputy Prime Minister Iryna Vereshchuk on Sunday said that Kyiv had agreed the use of nine humanitarian corridors to help people to escape heavy fighting in the east of the country, including in private cars from Mariupol. Link [here](#).

- Minister of Health Viktor Liashko said work has begun on restoration of medical facilities and medical humanitarian aid is being actively delivered to Chernihiv region. Link [here](#).

- Population movement within Ukraine contributes to steady increase of patients who received care outside their permanent residence with increased patient workload in the western part of the country. The movement is clearly visible by the increase in number of antenatal care services and other essential care such as hemodialysis. As more and more women are leaving Ukraine declining number of obstetrics and neonatal care cases are observed.

- The Ukraine Ministry of Health together with the Coalition for Vaccination have announced that mobile COVID-19 vaccination teams will resume in April in 5 oblasts: Transcarpathian, Ivano-Frankivsk, Lviv, Rivne and Ternopil. Priority will be given to those over 60 years old. Link [here](#).

- The EMT Japan Disaster Relief Team JDRT (JICA) will be supporting MoH in Republic of Moldova in setting up a national EMT. This was upon the team well-appreciated information management support as part of Ukraine Response within the established EMTCC in the country.

- EMTCC/Trauma and Rehab WG under health Cluster mapped Rehab needs inside Ukraine by Oblasts, with the support of Health Information Management pillar RO for setting an operational map visualisation.
SITUATION UPDATE

Key humanitarian numbers

- Affected population: 18 million across the country
- Internally Displaced Persons (IDPs): 7.1 million people (out of the 18 million people affected)
- People in Need: 12 million
- People Targeted: 6 million
- The Prosecutor General’s office of Ukraine reported, as of 13 April, 191 children had been killed and more than 349 injured
- For the past 24 hours, RF forces reportedly continued offensive operations on Mariupol, Kherson, Kharkiv, Dnipro and in the Donbas region
- As of 12 April, UNHCR report that 4656509 have fled the country, around 2.6 million of them cross through Poland, 0.7 million via Romanian borders
- In Zakarpattia oblast, 47 samples of drinking water were tested in March, microbiological content detected in 16 samples. Escherichia coli was found in 2 facilities after investigation on 101 samples of ready-made culinary products and raw materials.

HEALTH INFORMATION

Conflict-related health information

- As of 13 April 2022, the Office of the UN High Commissioner for Human Rights (OHCHR) recorded:
  - 1 932 civilians killed (485 men, 313 women, 31 girls, and 54 boys, as well as 72 children and 977 adults whose sex is yet unknown)
  - 2 589 civilians injured (297 men, 222 women, 52 girls, and 52 boys, as well as 146 children and 1 820 adults whose sex is yet unknown)
- Most of the civilian casualties recorded were caused by the use of explosive weapons with a wide impact area, including shelling from heavy artillery and multiple launch rocket systems, and missile and air strikes.

COVID-19 and other communicable diseases

- Number of COVID-19 designated beds in the regions overall decrease of -41.4%. The most considerable change is in Luhansk oblast: -100%; Zhytomyr oblast: -74.7%; Khmelnytskyi oblast: -71.5%. As of April 12.
- Average 7-day number of PCR tests decreased from 42 460 to 1 578. Number of approx. 1 500 tests per day remains stable during last 2 weeks. Dropdown in 7-day averaged number of conducted Ag-RDT tests is from 51 484 as of February 23 to 4 625 as of April 12.
- Average number of COVID-19 related deaths is 17 per day during last 7 days compared to 240 during the week before February 24, 2022.
- Average number of COVID-19 new cases is 1 556 per day during last 7 days compared to 24 629 during the week before February 24, 2022.
UKRAINE COUNTRY OFFICE ACTIONS

Leadership & Coordination

Leadership
- Regular consultation at higher level on staff presence in different location of the country, including the capital Kyiv

Health Cluster/Partner updates:
- The Health Cluster for Ukraine currently has 97 partners, 73 of whom are operational partners (International Non-Governmental Organizations: 19; International Organizations: 2; national NGOs: 49; UN: 2. Partner activities span 76 unique settlements in 24 oblasts.
- Health Cluster Ukraine held a national meeting for partners on Wednesday 13 April at 4pm (GMT+2). The meeting was attended by more than 127 participants with presentation from:
  - WHO Health Information Team on the Ukraine surveillance system & Standard Guidelines for Mobile Teams
  - OCHA on the Assessment Registry
  - IOM presented on the Ukraine Internal Displacement Report - Round 2 of their General Population Survey
  - REACH presented on the Interagency Rapid Needs Assessment
  - The HNRP form was launched to enable partners to upload requests online via a KoBo tool. The tool is currently being piloted and will be live to all partners next week
- Preparations are ongoing to launch household- and community-level health needs assessments using KoBo. Information sessions for partners are being held on Thursday 14 April and Friday 15 April. Launch of the tools is expected on 18 April.
- All TWGs continue to conduct regular weekly coordination meeting, a new working group on risk communication and community engagement is created.
Service utilization after the beginning of the war has significantly declined nearly by half compared to the pre-war level. In the last few weeks, the utilization of healthcare has gradually increased. The maximum drop was observed in the northern part of the country, the minimum reduction in the western region, reflecting the escalation of the war.

Population movement within Ukraine also contributes to a steady increase of patients who received care outside their permanent residence with main additional patient workload in the western part of the country. The movement is clearly visible by an increase in number of antenatal care services and other essential care such as hemodialysis. As more and more women are leaving Ukraine, declining number of obstetrics and neonatal care cases are observed.

Whereas some services can be delayed by a few weeks, dialysis or oncology treatment have to continue and such services also experienced the lowest decrease. The resilience of the health sector is further proven by a gradual increase in the last few weeks of patients with circulatory diseases (stroke or acute myocardial infarction).

The NHSU has paid over UAH 9 billion to medical institutions in April (approximately USD 300 million):

<table>
<thead>
<tr>
<th>Service package category</th>
<th>Amount Paid</th>
</tr>
</thead>
<tbody>
<tr>
<td>For the provision of specialized, palliative medical care, medical rehabilitation, medical care for children under 16 and for medical services during pregnancy and childbirth</td>
<td>UAH 6,072,569,164 (~ USD 200 million)</td>
</tr>
<tr>
<td>For the provision of emergency medical care</td>
<td>UAH 946,756,389 (~ USD 32 million)</td>
</tr>
<tr>
<td>For the provision of primary health care</td>
<td>UAH 2,058,771,480 (~ USD 70 million)</td>
</tr>
<tr>
<td>Total</td>
<td>UAH 9 billion (~300 million)</td>
</tr>
</tbody>
</table>

The government has increased spending on the health care system by UAH 200 million.

As of April 09, 2022, there are 1,658 healthcare workers in the oblasts who have been forced to change their location and find employment in other regions of the country.
UKRAINE COUNTRY OFFICE ACTIONS

Health operations

Emergency Medical Teams (EMT) current on-going operations:

- To push EMTs to work in the eastern part of the country
- The Rehab group made a request to the Ministry of Health (MoH) for the spinal and brain Rehab Center to be set up in Rivne
- Working closely with MoH on larger medical evacuation plan to transport patients. It is anticipated the number of transfers to Poland for further evacuation to EU countries will increase
- One EMT is specialized in ambulance transport will coordinate international ambulances participating in transporting patients from Lviv to Poland. There is a challenge in the number of partners that have ambulance to operationalize
- WHO and Ministry of Health held five webinars on various relevant topics to the current situation in Ukraine:
  - Between 28 March – 7 April, 4 webinars on chemical exposure with 1 200 health care providers participated
  - 12 April 2022, a webinar on mass casualty with 650 health care providers participated
  - Between 2 – 8 April, 10 on-site trainings on trauma management in Lviv (4) and Lviv Oblast (6)

The webinars accommodate up to 3 000 participants. Positive feedback on the webinars and request to have them continued are received from professional and government representatives.

Videos from the training (English version) can be found here; for Ukraine version can be found on Facebook
Health information and Planning

- Household needs assessment launched, together with Premise,
- Established chemical event tracking database
- Bi-weekly media monitoring in 11 regions of Ukraine, signal on Diphtheria outbreak was picked yesterday 12 April, a 29 years old IDP from Donetsk currently in Ternopil Oblast.
- Health Info surge support from HQ will arrive Ukraine
